

IBM Sterling Selling and Fulfillment Foundation Part. Modeling and User Security

Duration: 2 Days **Course Code: 6F02G**

Overview:

This 2-day instructor-led course provides you with an understanding of the configurations that are required to map all participants in a supply chain to the corresponding roles in Sterling Selling and Fulfillment Suite. This course is primarily designed for Hub and Enterprise administrators.

This course begins with an overview of Sterling Selling and Fulfillment Suite and a brief introduction of its business models. The course then describes how to define Participants and create Organizations and users. Through a combination of procedural information and exercises, you learn about topics such as how to assign attributes to the different roles defined in Sterling Selling and Fulfillment Suite and configure user access policies.

Target Audience:

This course is designed to train Hub and Enterprise administrative users to map the participants in a supply chain to their appropriate roles in Sterling Selling and Fulfillment Suite.

Objectives:

- Map the participant details to their appropriate Roles using Application Platform.
- Create Users and Configure user security features using Application Platform.

Prerequisites:

There are no prerequisites for this course.
