Introducing z/OS UNIX System Services

Duration: 3 Days Course Code: OP05G Delivery Method: Virtual Learning

Overview:

Learn how to use z/OS UNIX System Services to work with files, directories, processes, shells, and applications in a UNIX environment integrated with IBM z/OS systems.

Open standards in z/OS describes the z/OS open systems server and teaches participants how to use UNIX system services from an end-user or application perspective.

Target Audience:

- All computer professionals that intend to use z/OS UNIX services.

Objectives:

- **After this course participants should be able to:**
- Discuss the role of z/OS in an open systems environment
- Understand basic UNIX terminology and how UNIX is implemented in z/OS
- Define the components of z/OS UNIX services
- Explain the major functions provided in z/OS UNIX services
- Discuss opportunities for applications in an z/OS UNIX environment
- Use the interactive interfaces available to access UNIX services

Prerequisites:

Before attending this course, participants should have a basic knowledge of z/OS and z/OS skills as can be obtained by attending ES47GB - Introduction to ISPF and ES07GB - z/OS JCL and Utilities.

Content:

- Overview
- Introduction to UNIX
- Open functions in z/OS
- Hierarchical file system
- Shell and utilities
- Application Services
