Nutanix Enterprise Cloud Administration

Duration: 4 Days **Course Code: GK9915** **Version: 5.15** **Delivery Method: Virtual Classroom**

Overview:

The Nutanix Enterprise Cloud Administration (ECA) 5.15 course enables administrators (system, network, and storage) to successfully configure and manage Nutanix in the datacenter.

The course covers many of the tasks Nutanix administrators perform through the use of graphical user interfaces (GUIs) and command line interfaces (CLIs).
It also provides insight into a Nutanix cluster's failover and self-healing capabilities, offers tips for solving common problems, and provides guidelines for collecting information when interacting with Nutanix Support.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

The primary audience for the course includes administrators, architects, and business leaders who manage Nutanix clusters in the datacenter, and anyone who is seeking the Nutanix Certified Professional (NCP) certification.

The secondary audience includes managers and technical staff seeking information to drive purchase decisions.

Content:

	running AHV.	14: Cluster Management and Expansion
You will learn how to display and manage network details, differentiate between supported OVS bond modes, and gain insight into default network configuration.		15: Remote Office Branch Office (ROBO)
