

EMC Ionix Network Configuration Manager Application and Device Management (formerly Voyence Control)

Duration: 3 Days **Course Code: VOYAM**

Overview:

This course will provide the required information to effectively manage the configuration and compliance state of network devices using EMC Ionix Network Configuration Manager (formerly VoyenceControl).

Target Audience:

This course is intended for customers, partners, and internal personnel who are responsible for the management of network devices managed by an EMC Ionix Network Configuration Manager (NCM) implementation.

Objectives:

- Upon successful completion of this course, participants should be able to:
 - Manage configuration and change management of devices in an EMC Ionix NCM Network.
 - Describe the Attributed Model and Multi-Configuration
 - Create and enforce network policies
 - Determine device state using device properties
 - Manage devices using the Config Editor, Configlet Editor, Command Editor, and
 - Interface Editor
 - Use EMC Ionix NCM to roll credentials on network devices
 - Create Attributed Queries and Compliance Tests
 - Use the EMC Ionix NCM Event Manager to monitor network system, security, and device events
 - Create and Enforce Network Policies
 - Use Engineering Workspaces to plan changes to a network configuration
 - Configure Voyence Report Advisor and run reports on the state of the network
-

Prerequisites:

To understand the content and successfully complete this course, a student must have a suitable knowledgebase/skill set. The student must have an understanding of Network Configuration/Change Management (NCCM) principles and basic system administration skills.

A list of specific prerequisite courses can be found in EMC Education Services Learning Management System.

Testing and Certification

Assessments validate that you have learned the knowledge or skills presented during a learning experience. This course does not include an assessment.

Content:

These modules are designed to support the course objectives. The following modules are included in this course:

- EMC Ionix NCM Console Overview
- Network Discovery
- Global Environment
- Device Management
- Editors
- Automation Library and Templates
- Automation Library
- Compliance Wizard
- Attributed Model
- Workspaces and Template Merge
- Report Advisor

Labs:

Labs reinforce the information you have been taught. The labs for this course include:

- Configure EMC Ionix NCM and Discover a Network
- Global Environment System and Devices
- Device Management
- Editors
- Automation Library and Templates
- Automating the Workflow
- Compliance Wizard
- Attributed Model
- Workspaces and Template Merger
- Report Advisor
- Final Lab
