
IBM Spectrum Protect 8.1.2 Implementation and Administration

Duration: 5 Days **Course Code: TS616G**

Overview:

IBM Spectrum Protect 8.1.2 is a data backup and recovery solution designed to help you manage your data retention, reduce the cost of storage, and provide appropriate recovery point objectives to meet any service level agreement. IBM Spectrum Protect offers improved efficiency and flexibility using object - based data management and policy driven retention. This five day course will focus on implementation and basic administration of a IBM Spectrum Protect environment. The hands - on lab exercises are performed on a Windows 2012 environment. The course materials include examples of AIX and Linux commands, when different from Windows.

Target Audience:

This lecture and exercise based course is for implementers and administrators who are new to IBM Spectrum Protect data management.

Objectives:

- After completing this course, you should be able to:fter completing this course, you should be able to:
 - Describe the purpose of IBM Spectrum Protect
 - Install and configure the IBM Spectrum Protect components
 - Use the administrative and client interfaces
 - Discuss storage methodology options and create storage pool
 - Customize data movement and retention policies to meet business requirements
 - Configure the IBM Spectrum Protect database and storage pools for protection
 - Optimize client configuration
 - Perform backup, restore, archive and retrieve operations
 - Organize daily tasks required to protect the IBM Spectrum Protect environment
 - Automate and monitor client and administrative tasks and events
-

Prerequisites:

Can you answer yes to these two statements?

- Experience navigating Windows 2012
- A basic understanding of concepts regarding client/server relationships

You may wish to take Introduction to Storage prior to this class.

- o Introduction to Storage (SS01G) or
- o Foundations of Storage (SS00DG) - (Web)

More information is available at www.ibm.com/training

Content:

o Day 1	Unit 4: Storage pools and devices exercise	Unit 8: Client data protection lecture
■ Unit 1: Components and concepts lecture	Unit 5: Policy management, data movement, and exploration lecture	Unit 8: Client data protection exercise
Unit 1: Components and concepts exercise		
Unit 2: Installation and configuration lecture	o Day 3	Unit 9: Daily operations and maintenance lecture
Unit 2: Installation and configuration exercise	■ Unit 5: Policy management, data movement, and exploration exercise	o Day 5
o Day 2	Unit 6: Server database and storage pool management lecture	■ Unit 9: Daily operations and maintenance exercise
■ Unit 3: Interfaces and monitoring lecture	Unit 6: Server database and storage pool management exercise	Unit 10: Schedules and reports lecture
Unit 3: Interfaces and monitoring exercise	Unit 7: Client configuration lecture	Unit 10: Schedules and reports exercise
Unit 4: Storage pools and devices lecture	o Day 4	
	■ Unit 7: Client configuration exercise
