Administration of IBM Business Process Manager Standard V8.5

Duration: 4 Days      Course Code: WB812G

Overview:
In this four-day course, you learn the skills that are required to install, configure, and administer IBM Business Process Manager Standard V8.5.

Target Audience:
This basic course is designed for systems administrators, solutions administrators, and operators who install, configure, manage, and troubleshoot process applications.

Objectives:
- Configure and administer a Process Center environment
- Deploy and manage process applications
- Configure and administer a Process Server environment
- Work with the administrative console and management tools
- Describe the purpose and business value of the tools included in IBM Business Process Manager Standard V8.5: IBM Process Server and IBM Process Center
- Deploy applications to an offline and online Process Server environment
- Describe IBM Business Process Manager Standard architecture, concepts, and terminology
- Implement SSL
- Describe the deployment considerations for IBM Business Process Manager Standard components
- Integrate with Lightweight Directory Access Protocol (LDAP) to secure the environment
- Create a Process Center clustered environment by using the Deployment Environment wizard
- Troubleshoot the environment
- Create a Process Server clustered environment by using the BPMConfig utility

Prerequisites:
You should have a general knowledge of:
- The Linux operating system
- Java Platform, Enterprise Edition (Java EE) and Extensible Markup Language (XML)
- Administering multitier business applications
- Managing WebSphere Application Server
- Managing a database server, such as DB2, MS SQL Server, or
Oracle database
You should also successfully complete one of the IBM WebSphere Application Server V8.0 Administration courses (WA180), (WA380), (WA580), (VA180), (VA380), (VA580), (ZA380), or (ZA580) or IBM WebSphere Application Server V8.5 Administration courses (WA585), (VA585), or (ZA585).
Overview of IBM Business Process Manager V8.5
IBM Business Process Manager Standard installation
IBM Business Process Manager Standard architecture overview
Exercise: Installing IBM Business Process Manager Standard
Exercise: Installing IBM HTTP Server
IBM Business Process Manager deployment topologies
Exercise: Configuring the Process Server environment
Exercise: Managing offline and online process servers
Managing snapshots
Exercise: Creating and managing snapshots
Advanced administration concepts
Problem determination
Exercise: Performance and troubleshooting
Security
Exercise: Configuring SSL
Exercise: Implementing security with LDAP
Course summary
