
IBM Forms 8.0 Workshop

Duration: 3 Days **Course Code: WPW20G**

Overview:

Do you need an effective method to capture and validate end user input, in real time, either from the Web or in stand-alone applications? Are you in an industry that requires an exact match to existing web applications or paper forms to meet government or industry regulations? Is there a need to upgrade the end user experience to eliminate input errors so that only validated and required data is collected by your application or service?

IBM Forms V8.0 automates forms-based business processes to help improve efficiency, customer service, and time to value making you more responsive to customer and market needs. IBM Forms V8.0 enables Line-of-Business and IT users to collect data and automate processes via agile web-applications, as well as classic document based forms applications in one nicely integrated package, which can also be utilized on iOS and Android tablet based devices.

A new key feature in IBM Forms version 8.0 introduces IBM Forms Experience Builder, which provides the following benefits to line of businesses and IT users:

Exceptional web-based data collection applications,
Easy-to-use, web-driven creation of compelling, data collection user interface,
Lightweight routing for approvals and notifications,
CSS-based styling,
Easy integration with REST Services via REST API.

Target Audience:

This intermediate course is designed for IBM Forms Solution Architects and developers.

Objectives:

- Learn about the key features provided in IBM Forms version 8 with the focus on the new IBM Forms Experience Builder.
 - Using the IBM Forms Experience Builder, you will learn to use the simple web-based user interface to:
 - develop interactive form driven applications
 - integrate role based security
 - implement the integrated lightweight routing for approvals and notifications
 - explore personalized integration with WebSphere Portal
 - leverage open standards utilizing REST API services
-

Prerequisites:

You should have:

- Good technical understanding of Internet concepts
 - General understanding of object-oriented programming concepts, systems, and languages
 - Some knowledge of Web 2.0 concepts
 - Experience with XML and Java technology is desirable.
 - Experience with IBM Forms development is recommended.
-

Content:

- Introduction to IBM Forms 8.0 and Forms Experience Builder (FEB)
 - IBM Forms Experience Builder (FEB) Overview
 - IBM Forms Classic vs. IBM Forms Experience Builder
 - LAB: IBM FEB UI Tour Introduction
 - LAB: IBM FEB Application Development
 - IBM Forms Experience Builder - Custom Themes
 - LAB: Creating Custom Themes
 - IBM Forms Experience Builder - Application Security
 - LAB: Exploring Application Security
 - FEB Personalization Integration with WebSphere Portal (FEB Installation and configuration)
 - LAB: Integrating IBM Forms Experience Builder with WebSphere Portal
 - IBM Forms Experience Builder Architecture and Services Integration
 - FEB JavaScript API
 - LAB: FEB JavaScript API
 - LAB: IBM Forms Experience Builder - REST API
 - IBM Forms 8.0 Classic Overview
 - IBM Forms 8.0 Classic Architecture
 - IBM Forms 8.0 Classic - Forms Designer
 - LAB: IBM Classic Forms 8.0 Designer
 - IBM Forms 8.0 Classic - WebForm Server vs. WebForm Viewer
 - LAB: Tour of IBM Forms Viewer
 - Integrating IBM Forms Classic with IBM Case Manager
-
