Power Systems for AIX I: LPAR Configuration and Planning

Duración: 3 Días      Código del Curso: AN11G

Temario:

Learn how to perform system administration in a Power Systems environment. Learn about the features of PowerVM Editions and how to configure and manage LPARs running AIX V7.1 using the Hardware Management Console (HMC).

Learning Journeys or Training Paths that reference this course: IBM Power AIX Power AIX Administrator Power AIX Administrators: Virtualization IBM Power systems for AIX virtualization

Dirigido a:

This course is appropriate for system administrators, technical support individuals, and IBM business partners who implement LPARs on IBM Power Systems.

Objetivos:

- Describe important concepts that are associated with managing POWER8 processor-based systems, such as logical partitioning, dynamic partitioning, virtual devices, virtual processors, virtual consoles, virtual local area network (VLAN), and shared processors
- Describe the features of the PowerVM editions
- Describe the functions provided by the HMC
- Configure and manage the HMC, including users and permissions, software, start and shutdown, remote access features, network configuration, security features, HMC backup and restore options, and the HMC reload procedure
- Describe the rules that are associated with allocating resources, including dedicated processors, processing units for Micro-Partitioning, memory, logical host Ethernet adapter, and physical I/O for AIX and Linux partitions
- Configure and manage LPARs by using the HMC graphical user interface (GUI) and HMC commands
- Interpret physical and AIX location codes and relate to the key hardware components
- Power on and power off the Power Systems server
- Use the HMC to back up and restore partition data
- Perform dynamic LPAR operations (DLPAR)

Prerequisitos:

This introductory course does not require any logical partitioning experience.

General TCP/IP knowledge is strongly recommended. This prerequisite can be met by attending TCP/IP for AIX System Administrators (AN21G).
Siguientes cursos recomendados:

If you do not already have AIX system administration skills, it is recommended that you attend AN12G: Power Systems for AIX II: AIX Implementation and Administration.

If you are planning to manage a system using PowerVM Virtualization, the next course to attend is AN30G: Power Systems for AIX - PowerVM I: Implementing Virtualization.
