IBM WebSphere Business Modeler V6.2: Process Simulation and Analysis

Duración: 2 Días   Código del Curso: WB286G

Temario:

An updated version of this course is available. For more information, click *IBM WebSphere Business Modeler V7: Process Simulation and Analysis (WB786)*

This two-day instructor-led course teaches students how to use IBM WebSphere Business Modeler V6.2 to conduct process simulation and analysis, create custom reports, and export process models into various formats.

This course provides students with an overview of business process simulation and analysis, with a focus on learning the concepts and skills needed to set up and run simulations in WebSphere Business Modeler V6.2. Students learn how to explore profiles and conduct a dynamic analysis of simulation results, as well as create custom reports and define business measures in process models. In addition, this course covers process improvement, how to export models from WebSphere Business Modeler, and how to apply statistical distributions to process models.

Hands-on lab exercises provided throughout the course enable students to gain direct experience working with WebSphere Business Modeler V6.2. Students learn how to define simulation settings, run simulations, conduct analyses of process models, create custom reports using style masters and report templates, define business measures, and monitor performance indicators. Students also learn how to redesign process models and conduct comparative analysis.

Dirigido a:

This intermediate course is designed for:Business analystsImplementation consultantsProject managersSupport engineersSales and marketing professionalsAnyone who needs training in process simulation, analysis, and reporting using WebSphere Business Modeler V6.2

Objetivos:

- Set up and run a simulation
- Conduct dynamic analysis
- Identify methods for process improvement

- Create custom queries and reports
- Describe the purpose of business measures
- Export projects from WebSphere Business Modeler

Prerequisitos:

-

Contenido:

- Course introduction
- Review of process mapping and analysis
- Introduction to simulation and analysis
- Setting up and running simulations
- Exercise: Simulation and analysis
- Profile and dynamic analysis

- Exercise: Dynamic analysis
- Process improvement
- Exercise: Process improvement
- Custom reports and queries
- Exercise: Creating a custom report
- Defining business measures

- Exercise: Defining business measures in WebSphere Business Modeler
- Exporting from WebSphere Business Modeler
- Exercise: Exporting from WebSphere Business Modeler
- Course review
- Course summary
