

IBM Tivoli Netcool/OMNIBus 7.3 User

Duration: 2 Days Course Code: TN013G

Overview:

The IBM Tivoli Netcool OMNIBus 7.3 release incorporates several advancements over previous versions of this enterprise level operations management solution. This course will cover the aspects, utilization and configuration setting of the User interfaces. Participants configure and utilize both the legacy and new Web GUI interface including the Tivoli Integrated Portal. Participants will work with defined pages, maps filters and views as well as how to specify multiple data source event lists. New functionality around creating maps, filters and views will be examined. Participants will configure client Accelerated Event Notifications.

Target Audience:

This intermediate-level course is for existing OMNIBus V7.2.1 and earlier advanced administrators and users. This course is intended to update current skill sets of support personal and user communities to version 7.3 functionality.

Objectives:

- | | |
|---|--|
| ■ Install and describe the client interfaces components | ■ Describe product integrations |
| ■ | ■ |
| ■ Describe client system architecture | ■ Configure and utilize predefined pages and the Active Event List new functionality |
| ■ | ■ |
| ■ Configure legacy client components | ■ Utilize legacy NGF client tools |
| ■ | ■ |
| ■ Utilize the TIP Portal | ■ Configure Filters and Views |
| ■ | ■ |
| ■ Navigate and configure the Web GUI portal | ■ Utilize and describe new user interface functionality |
| ■ | |

Prerequisites:

Students should have the following skills:

- Linux/UNIX System administration experience
- Understanding of basic networking protocols and addressing
- Understanding of HTML / XML code construction
- Ability to navigate an operational Netcool/OMNIBus with Web GUI environment
- Intermediate Netcool/OMNIBus configuration skills

Content:

Unit 1 - Initial client setup

- Examine client system configurations
- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNibus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client
- Legacy AEN functionality
- Web GUI AEN functionality
- Utilize TIP portal elements
- Navigate within the TIP and Web GUI pages
- Manage concurrent open pages
- Enable Auto-Start preferences
- Add pages to the MY Tasks view
- Utilize troubleshooting and System Information links
- Configure event list refresh rates
- Change and save passwords
- Describe personal, Global and System filters
- Assign Multiple data sources for filters
- Utilize the filter builder functionality
- Utilize and create basic filter SQL statements
- Describe personal, Global and System views
- Assign Multiple data sources for views
- Define Views to accept differing column definitions from ObjectServers
- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing
- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNibus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client
- Legacy AEN functionality
- Web GUI AEN functionality
- Utilize TIP portal elements
- Navigate within the TIP and Web GUI pages
- Manage concurrent open pages
- Enable Auto-Start preferences
- Add pages to the MY Tasks view
- Utilize troubleshooting and System Information links
- Configure event list refresh rates
- Change and save passwords
- Describe personal, Global and System filters
- Assign Multiple data sources for filters
- Utilize the filter builder functionality
- Utilize and create basic filter SQL statements
- Describe personal, Global and System views
- Assign Multiple data sources for views
- Define Views to accept differing column definitions from ObjectServers
- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing

 - Describe personal, Global and System filters
 - Assign Multiple data sources for filters
 - Utilize the filter builder functionality
 - Utilize and create basic filter SQL statements

- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL page
- Utilize and describe AEL tools and actions on events
- Utilize map interactivity
- Utilize Event List displays
- Utilize active map icons
- Evaluate Dependant filters in maps
- Configure multiple data sources in maps
- Configure split page views (all pages)
- Utilize map elements
- Create a custom page - time permitted

Unit 2 - Client Components

Legacy client functionality -

- Configure legacy communication protocols

- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNibus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client
- Legacy AEN functionality
- Web GUI AEN functionality
- Utilize TIP portal elements
- Navigate within the TIP and Web GUI pages

- Utilize the filter builder functionality
- Utilize and create basic filter SQL statements
- Describe personal, Global and System views
- Assign Multiple data sources for views
- Define Views to accept differing column definitions from ObjectServers
- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL page
- Utilize and describe AEL tools and actions on events
- Utilize map interactivity
- Utilize Event List displays
- Utilize active map icons
- Evaluate Dependant filters in maps
- Configure multiple data sources in maps
- Configure split page views (all pages)
- Utilize map elements
- Create a custom page - time permitted

- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNibus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client
- Legacy AEN functionality
- Web GUI AEN functionality

- Describe personal, Global and System views
- Assign Multiple data sources for views
- Define Views to accept differing column definitions from ObjectServers
- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL page
- Utilize and describe AEL tools and actions on events
- Utilize map interactivity
- Utilize Event List displays
- Utilize active map icons
- Evaluate Dependant filters in maps
- Configure multiple data sources in maps
- Configure split page views (all pages)
- Utilize map elements
- Create a custom page - time permitted

- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNibus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client
- Legacy AEN functionality
- Web GUI AEN functionality
- Utilize TIP portal elements
- Navigate within the TIP and Web GUI pages
- Manage concurrent open pages

- Manage concurrent open pages
 - Enable Auto-Start preferences
 - Add pages to the MY Tasks view
 - Utilize troubleshooting and System Information links
 - Configure event list refresh rates
 - Change and save passwords
 - Describe personal, Global and System filters
 - Assign Multiple data sources for filters
 - Utilize the filter builder functionality
 - Utilize and create basic filter SQL statements
 - Describe personal, Global and System views
 - Assign Multiple data sources for views
 - Define Views to accept differing column definitions from ObjectServers
 - Utilize the view builder functionality
 - Utilize and describe Event Dashboard icons and preferences pop-ups
 - Configure Dashboard layouts, menu options and visuals
 - Configure multiple data source entries for monitor boxes
 - Modify and edit user and system wide setting for Dashboard page
 - Describe how filter SQL determines list elements
 - Utilize the AEL icons, menus and filter and view assignments
 - Modify and edit user and system wide setting for AEL page
 - Configure multiple data source entries for AEL page
 - Implement AEL with views containing different columns from different ObjectServers
 - Describe elements/indicators of the AEL page
 - Utilize and describe AEL tools and actions on events
 - Utilize map interactivity
 - Utilize Event List displays
 - Utilize active map icons

- Utilize troubleshooting and System Information links
- Configure event list refresh rates
- Change and save passwords
- Describe personal, Global and System filters
- Assign Multiple data sources for filters
- Utilize the filter builder functionality
- Utilize and create basic filter SQL statements
- Describe personal, Global and System views
- Assign Multiple data sources for views
- Define Views to accept differing column definitions from ObjectServers
- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL page
- Utilize and describe AEL tools and actions on events
- Utilize map interactivity
- Utilize Event List displays
- Utilize active map icons
- Evaluate Dependant filters in maps
- Configure multiple data sources in maps
- Configure split page views (all pages)
- Utilize map elements
- Create a custom page - time permitted

Unit 3 - Web GUI configurations

Filters -

- Search, create, copy, delete and modify filters and assign accessibility
- Describe system architecture and components

- Enable Auto-Start preferences
 - Add pages to the MY Tasks view
 - Utilize troubleshooting and System Information links
 - Configure event list refresh rates
 - Change and save passwords
 - Describe personal, Global and System filters
 - Assign Multiple data sources for filters
 - Utilize the filter builder functionality
 - Utilize and create basic filter SQL statements
 - Describe personal, Global and System views
 - Assign Multiple data sources for views
 - Define Views to accept differing column definitions from ObjectServers
 - Utilize the view builder functionality
 - Utilize and describe Event Dashboard icons and preferences pop-ups
 - Configure Dashboard layouts, menu options and visuals
 - Configure multiple data source entries for monitor boxes
 - Modify and edit user and system wide setting for Dashboard page
 - Describe how filter SQL determines list elements
 - Utilize the AEL icons, menus and filter and view assignments
 - Modify and edit user and system wide setting for AEL page
 - Configure multiple data source entries for AEL page
 - Implement AEL with views containing different columns from different ObjectServers
 - Describe elements/indicators of the AEL page
 - Utilize and describe AEL tools and actions on events
 - Utilize map interactivity
 - Utilize Event List displays
 - Utilize active map icons
 - Evaluate Dependant filters in maps
 - Configure multiple data sources in maps
 - Configure split page views (all pages)
 - Utilize map elements
 - Create a custom page - time permitted
-
- Describe system architecture and components
 - Install legacy client system applications
 - Configure new client Web GUI functionality
 - Configure system variables
 - Access and navigate legacy directory structures
 - Launch the legacy OMNibus Conductor component
 - Utilize Conductor GUI elements
 - Configure and utilize the Event List component
 - Create filters, views and event list configuration files

- Utilize the view builder functionality
 - Apply created legacy configurations within the Conductor
 - Configure the Accelerated Event Notification client
 - Legacy AEN functionality
 - Web GUI AEN functionality
 - Utilize TIP portal elements
 - Navigate within the TIP and Web GUI pages
 - Manage concurrent open pages
 - Enable Auto-Start preferences
 - Add pages to the MY Tasks view

- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL page
- Utilize and describe AEL tools and actions on events
- Utilize map interactivity
- Utilize Event List displays
- Utilize active map icons
- Evaluate Dependant filters in maps
- Configure multiple data sources in maps
- Configure split page views (all pages)
- Utilize map elements
- Create a custom page - time permitted

Tivoli Integrated Portal and Web GUI client functionality introduction -

- statements
- Describe personal, Global and System views
- Assign Multiple data sources for views
- Define Views to accept differing column definitions from ObjectServers
- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL page
- Utilize and describe AEL tools and actions on events
- Utilize map interactivity
- Utilize Event List displays
- Utilize active map icons
- Evaluate Dependant filters in maps
- Configure multiple data sources in maps
- Configure split page views (all pages)
- Utilize map elements
- Create a custom page - time permitted

Event Dashboard -

- Utilize default Event Dashboard page
- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNIBus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client

- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL page
- Utilize and describe AEL tools and actions on events
- Utilize map interactivity
- Utilize Event List displays
- Utilize active map icons
- Evaluate Dependant filters in maps
- Configure multiple data sources in maps
- Configure split page views (all pages)
- Utilize map elements
- Create a custom page - time permitted

Map basic configuration -

- Configure basic map layout
- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNIBus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client
- Legacy AEN functionality
- Web GUI AEN functionality
- Utilize TIP portal elements
- Navigate within the TIP and Web GUI pages
- Manage concurrent open pages
- Enable Auto-Start preferences
- Add pages to the MY Tasks view
- Utilize troubleshooting and System Information links
- Configure event list refresh rates
- Change and save passwords

■ Access the TIP portal

- Describe system architecture and components
- Install legacy client system applications
- Configure new client Web GUI functionality
- Configure system variables
- Access and navigate legacy directory structures
- Launch the legacy OMNibus Conductor component
- Utilize Conductor GUI elements
- Configure and utilize the Event List component
- Create filters, views and event list configuration files
- Utilize the filter builder functionality
- Utilize the view builder functionality
- Apply created legacy configurations within the Conductor
- Configure the Accelerated Event Notification client
- Legacy AEN functionality
- Web GUI AEN functionality
- Utilize TIP portal elements
- Navigate within the TIP and Web GUI pages
- Manage concurrent open pages
- Enable Auto-Start preferences
- Add pages to the MY Tasks view
- Utilize troubleshooting and System Information links
- Configure event list refresh rates
- Change and save passwords
- Describe personal, Global and System filters
- Assign Multiple data sources for filters
- Utilize the filter builder functionality
- Utilize and create basic filter SQL statements
- Describe personal, Global and System views
- Assign Multiple data sources for views
- Define Views to accept differing column definitions from ObjectServers
- Utilize the view builder functionality
- Utilize and describe Event Dashboard icons and preferences pop-ups
- Configure Dashboard layouts, menu options and visuals
- Configure multiple data source entries for monitor boxes
- Modify and edit user and system wide setting for Dashboard page
- Describe how filter SQL determines list elements
- Utilize the AEL icons, menus and filter and view assignments
- Modify and edit user and system wide setting for AEL page
- Configure multiple data source entries for AEL page
- Implement AEL with views containing different columns from different ObjectServers
- Describe elements/indicators of the AEL

- Legacy AEN functionality
 - Web GUI AEN functionality
 - Utilize TIP portal elements
 - Navigate within the TIP and Web GUI pages
 - Manage concurrent open pages
 - Enable Auto-Start preferences
 - Add pages to the MY Tasks view
 - Utilize troubleshooting and System Information links
 - Configure event list refresh rates
 - Change and save passwords
 - Describe personal, Global and System filters
 - Assign Multiple data sources for filters
 - Utilize the filter builder functionality
 - Utilize and create basic filter SQL statements
 - Describe personal, Global and System views
 - Assign Multiple data sources for views
 - Define Views to accept differing column definitions from ObjectServers
 - Utilize the view builder functionality
 - Utilize and describe Event Dashboard icons and preferences pop-ups
 - Configure Dashboard layouts, menu options and visuals
 - Configure multiple data source entries for monitor boxes
 - Modify and edit user and system wide setting for Dashboard page
 - Describe how filter SQL determines list elements
 - Utilize the AEL icons, menus and filter and view assignments
 - Modify and edit user and system wide setting for AEL page
 - Configure multiple data source entries for AEL page
 - Implement AEL with views containing different columns from different ObjectServers
 - Describe elements/indicators of the AEL page
 - Utilize and describe AEL tools and actions on events
 - Utilize map interactivity
 - Utilize Event List displays
 - Utilize active map icons
 - Evaluate Dependant filters in maps
