Oracle 11i eBusiness Suite Essentials for Implementers

Cursusduur: 2 Dagen   Cursuscode: O11IEFEI

Beschrijving:

This course provides an overview of the Oracle E-Business Suite. It covers all the essential areas that a functional implementer should know to start the journey with Oracle Applications.

Students learn about the major components of the 11i E-Business Suite architecture. They will be able to recognize the shared entities within 11i E-Business Suite. The key business flows and integration points between products in 11i E-Business Suite is covered in this course. The tasks covered include defining and creating flex fields. The Multi Org model and its key implementation constraints are introduced to the learner. In addition, students are given an overview of Oracle Workflow, the components that comprise workflow, and how to monitor a process in the workflow monitor. This course explains how alerts are used in 11i E-Business Suite and covers the differences between Event and Periodic Alerts.

The E-business Essentials for Implementers course provides a functional foundation for any e-Business Suite Fundamentals course Demonstrations and hands-on practice reinforces the fundamental concepts.
