
Windows 10 Bootcamp

Längd: 5 Days Kurskod: W10BC

Sammanfattning:

This 5 day instructor led course provides students the knowledge and skills to support Windows 10 in an enterprise environment. Explaining how to use, and isolate and resolve problems in a Windows 10 environment.

Målgrupp:

This course is intended for IT professionals who administer and support Windows 10 PCs, devices, users, and associated network and security resources. The networks with which these professionals typically work are configured as Windows Server domain-based environments with managed access to the Internet and cloud services. This course is also intended to provide foundation configuration skills for Enterprise Desktop/Device Support Technicians (EDSTs) who provide Tier 2 support to users who run Windows desktops and devices within a Windows domain environment in medium to large enterprise organizations. It is also intended to introduce the new features of Windows 10 to more experienced support technicians.

Målsättning:

- Describe solutions and features related to managing Windows 10 in an enterprise network environment.
 - Determine requirements and perform the tasks for installing and deploying Windows 10.
 - Manage profiles and user state between Windows devices.
 - Determine the most appropriate management tools to configure Windows 10 settings.
 - Configure disks, partitions, volumes, and device drivers in a Windows 10 system.
 - Configure network connectivity.
 - Configure resource connectivity for both domain-joined and non-domain joined PCs and devices.
 - Implement Windows 10 technologies to secure network connections.
 - Configure file, folder, and printer access.
 - Implement tools and technologies that can help secure Windows 10 PCs and devices.
 - Configure and control desktop apps, Windows Store apps, and virtual apps.
 - Optimize and maintain Windows 10 PCs and devices.
 - Configure mobile computer settings and to enable remote access.
 - Determine how to recover Windows 10 from various failures.
 - Describe and configure Client Hyper-V.
-

Förkunskaper:

- Experience working in a domain environment
 - Experience using desktop and command line trouble shooting skills
 - Experience Installing and troubleshooting desktop application problems
 - Experience configuring registry and Group Policy settings
 - TCP/IP troubleshooting skills.
-

Innehåll:

Module 1 Installing Windows 10

- Understand installation Upgrading and Migrating options for Windows 10
- Deploying Windows 10 using images
- Windows 10 licensing issues

Module 2 Using Windows 10

- Getting familiar with the windows 10 environment
- Powershell 5

Module 3 Managing Disks

- Learn to Managing disks and Drivers in Windows 10
- Create and booting from a VHD disk in Windows 10
- Understand the impact of Driver Updates
- Understand the Windows 10 Boot process

Module 4 Configuring Resource Access Windows 10

- Configuring Domain Access for Windows 10 Devices
- Resource Access for Non Domain Members
- Configuring Workplace Join
- Configuring Work Folders

Module 5 Client Hyper-v

- Overview of Client Hyper-V
- Creating Virtual Machines
- Managing Virtual Hard Disks
- Managing Checkpoints
- Installing Client Hyper-V
- Creating a Virtual Switch, a Virtual Hard Disk, and a Virtual Machine
- After completing this module, you will be able to:
- Describe the functionality and benefits of using Client Hyper V.
- Create virtual machines.
- Manage virtual hard disks.
- Manage checkpoints.

Module 6 Using Windows 10 in an Active Directory environment

- Configure authentication and authorization
- Identify and resolve logon issues
- Administering Local and Group policy objects
- Understanding and Managing Folder Redirection and User Profiles including Local, Remote and Mandatory profiles.
- Implementing and Configuring UE-V
- Configure User Account Properties in Active Directory
- Configure file and folder access

Module 7 Securing Windows 10

- Configure BitLocker and BitLocker To Go
- Configure file and folder access
- Identifying and resolving encryption issues
- Configuring offline file policies

Module 8 Maintaining and Optimizing Windows 10

- Configuring event logging; filtering event logs; event subscriptions
- Configuring data collector sets; generating a system diagnostics report
- Analyzing system and application logs; analyzing started services
- Configuring update settings
- Identifying software update level

Module 9 Recovering Windows 10

- Configuring Backup and Recovery Options
- restoring previous versions of files and folders;

Module 10 Mobile computing and Remote Access

- Connecting to a wireless network;
- configuring security settings on the client;
- set preferred wireless networks;
- configuring network adapters
- Identify and resolve wireless connectivity issues

Module 11 Implementing Network Security

- Securing Network Application and Features;
- Firewall rules;
- Configure Notification and Logging;
- Network Security Tools;
- Identify and Resolve Firewall Issues
- Using Windows Defender

Module 12 Using applications with Windows 10

- Configure user account control
- Configure application compatibility
- Configure application restrictions
- Identify cause of and resolve software failure issues
- Identify and resolve software configuration issues
- Windows store
- Using the new features in Microsoft's new browser
