TACL programming

Duration: 5 Days   Course Code: U4199S

Overview:

Master the art of writing functions in the Tandem Advanced Command Language (TACL) progam in this 5-day course. Through student projects and hands-on labs, you will gain valuable experience with TACL programming. After completing this course, you will be able to write macros and routines, perform file I/O, use structured data, and write server functions.

Target Audience:

This course is suitable for System programmers, System and network managers, Application designers, Application programmers, System analysts and Data communications programmers and analysts.

Objectives:

- Overview of TACL features.
- Directories and segments.
- writing functions-macros.
- Writing functions - #LOOP.
- Writing functions - debugging.
- Writing functions - routines.
- Inline processing.
- Define process.
- Using DEFINEs.

- TACL variables.
- Editing variables.
- Writing functions - #IF.
- Writing functions - #CASE.
- Writing functions – file I/O.
- Using structures.
- Writing functions – server files.
- Writing functions – exception.

Prerequisites:

- Concepts and Facilities course.
- Knowledge of at least one other programming language
- At least six months of programming experience.
