

## ITIL® 4 Specialist IT Asset Management - Including Exam

**Duration: 3 Days**    **Course Code: ITIL4ITAM**    **Delivery Method: Virtual Learning**

### Overview:

The ITIL 4 IT Asset Management module is structured and aligned around the ITIL framework and the ITIL Practice Guides. The examination is intended to assess whether the candidate can demonstrate sufficient understanding and application of the concepts covered in the ITIL 4 IT Asset Management publication.

This module focuses on providing the candidates with the understanding of the key concepts, principles, value and challenges of the IT Asset Management practice. It is intended to provide candidates with best practice guidance at both strategic and operational levels on how to maximize value creation, control costs, manage risks, meet regulatory and contractual requirements, and support decision-making about the purchase, re-use, retirement, and disposal of IT assets including their impact on sustainability.

In addition, the ITIL Maturity Model is introduced as a tool to help candidates assess and measure the organization's capabilities in service management and identify actions on improvement opportunities to develop ITAM capabilities.
