Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Prerequisites:

- Basic understanding of IT concepts.
- Basic understanding of business concepts.

Content:

1- Leverage AI tools and resources for your business

This module provides a high-level overview of the primary concepts of AI and the technologies behind it. You'll learn how Microsoft is embedding AI into tools, products, and services that can be used by organizations.

- Get familiar with available AI tools and approaches.
- Understand basic AI terminology and practices.
- Identify AI use cases.

2- Create business value from AI

This module is designed to help you plan your AI strategy and adopt an AI-ready culture. It proposes a framework to drive that change in your organization.

- Articulate the components of an AI strategy.
- Describe the key elements of an AI-ready organizational culture.
- Understand the stages to AI success.

3- Embrace responsible AI principles and practices

This module is designed to help you adopt responsible AI practices. It offers an overview of the principles, governance system, and procedures followed at Microsoft, but we encourage you to develop your own AI strategy.

- Describe the importance of engaging with AI in a responsible manner.
- Identify six guiding principles to develop and use AI responsibly.
- Describe successful practices to responsible AI governance.

4- Scale AI in your organization

This module provides insights for a full adoption of AI in your organization. It covers AI strategy, assigning responsibilities, and empowering business users and subject matter experts so they can use AI themselves.

- Plan AI projects and investments.
- Organize your staff for AI responsibilities.
- Identify how no-code AI tools can help business users and subject matter experts.
