

Symantec Endpoint Protection 14.x Administration R1

Duration: 5 Days Course Code: S000229 Delivery Method: Virtual Learning

Overview:

The course is designed to provide the knowledge and skills required to administer Symantec Endpoint Protection 14.x, manage the SEPM console, configure security policies, and maintain endpoint protection across the enterprise.

Updated August 2026

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Network, IT security, and systems administration professionals responsible for administering Symantec Endpoint Protection and managing endpoint security policies through the SEPM console.

Objectives:

- **After this course participants should be able to:**
- Describe how the Endpoint Protection Manager (SEPM) communicates with clients and make appropriate changes as necessary.
- Design and create Endpoint Protection group structures to meet the needs of your organization.
- Respond to threats using SEPM monitoring and reporting.
- Analyze the content delivery system (LiveUpdate).
- Configure Group Update Providers.
- Create location aware updates.
- Secure endpoints against network and file-based threats
- Control endpoint integrity and compliance
- Enforce an adaptive security posture

Prerequisites:

This course assumes that students have a basic understanding of advanced computer terminology, including TCP/IP networking and Internet terms, and an administrator-level knowledge of Microsoft Windows operating systems.

Testing and Certification

- 250-428: Administration of Symantec Endpoint Protection 14

Follow-on-Courses:

The following courses are recommended for further learning and development:

- S000101 – Endpoint Protection 14.2 Maintain and Troubleshoot
- S000195 – Web Isolation Planning Implementation and Administration R2
- S000208 – Web Protection - Cloud SWG Planning, Implementation, and Administration
- S000304 – Symantec Edge SWG Administration

Content:

Module 1: Managing Console Access and Delegating Authority

- Creating Administrator Accounts
- Managing Administrator Accounts
- Configuring Directory Server Authentication for an Administrator Account

Module 2: Managing Client-to-Server Communication

- Analyzing Client-to-SEPM Communication
- Restoring Communication Between Clients and SEPM
- Verifying Clients are Online with the SEPM

Module 3: Managing Client Architecture and Active Directory Integration

- Describing the Interaction Between Sites, Domains, and Groups
- Managing Groups, Locations, and Shared Policies
- Importing Active Directory Organizational Units (OUs)
- Controlling Access to Client User Interface Settings

Module 4: Managing Clients and Responding to Threats

- Introducing the Clients View
- Monitoring SEP Clients Using the Clients View
- Responding to Incidents Using the Clients View

Module 5: Monitoring the Environment and Responding to Threats

- Monitoring Critical Log Data Using the Summary page
- Identifying New Incidents Using the Logs Page
- Monitoring Actions Sent to Clients Using the Command Status View
- Configuring Notifications

Module 6: Creating Incident and Health Status Reports

- Monitoring Critical Data Using the Reports Page
- Identifying New Incidents Using Quick Reports and Filters
- Configuring Scheduled Reports

Module 7: Introducing Content Updates Using LiveUpdate

- Describing the LiveUpdate Ecosystem
- Configuring LiveUpdate
- Troubleshooting LiveUpdate

Module 9: Managing Group Update Providers

- Introducing Group Update Providers
- Adding Group Update Providers
- Adding Multiple Group Update Providers and Configuring Explicit Group Update Providers
- Identifying and Monitoring Group Update Providers

Module 10: Manually Downloading Certified and Rapid Release Definitions

- Downloading Certified SEPM Definitions from Symantec Security Response
- Downloading Certified Windows Client Definitions from Symantec Security Response
- Downloading Rapid Release Definitions from Symantec Security Response
- Downloading Certified and Rapid Release Definitions from Symantec Security Response for Mac and Linux Clients
- Locating Statically Named Definitions

Module 11: Protecting Against Network Attacks and Enforcing Corporate Policies using the Firewall Policy

- Preventing Network Attacks
- Examining Firewall Policy Elements
- Creating Custom Firewall Rules
- Enforcing a Corporate Security Policy with Firewall Rules
- Configuring Advanced Firewall Features

Module 12: Blocking Network Threats with Intrusion Prevention

- Introducing Intrusion Prevention Technologies
- Configuring the Intrusion Prevention Policy
- Managing Custom Signatures
- Monitoring Intrusion Prevention Events

Module 13: Protecting Against Memory-Based Attacks

- Memory Exploit Mitigation
- Configuring the Memory Exploit Mitigation Policy
- Preventing Defense Evasion

Module 14: Preventing Attacks with SEP Layered Security

- Virus and Spyware Protection
- File Reputation
- Insight Lookup
- Emulator and Machine Learning Engine
- Download Insight
- Auto-Protect Scans

Module 17: Securing Mac Clients

- Touring SEP for Mac Client
- Securing Mac Clients
- Monitoring Mac Clients
- SEP Logs on Mac Clients

Module 18: Providing Granular Control with Host Integrity

- Introducing Host Integrity
- Host Integrity Concepts
- Configuring Host Integrity
- Troubleshooting Host Integrity
- Monitoring Host Integrity

Module 19: Controlling Application and File Access

- Application Control Overview
- Application Control Concepts
- Configuring Application Control
- Monitor Application Control Events

Module 20: Restricting Device Access for Windows and Mac Clients

- Introducing Device Control
- Windows Device Control Concepts
- Mac Device Control Concepts
- Configuring Device Control
- Monitoring Device Control Events

Module 21: Hardening Clients with System Lockdown

- Describing System Lockdown
- Creating and Managing the File Fingerprint List
- System Lockdown use cases

Module 22: Customizing Protection Based on User Location

- Creating Locations
- Adding Policies to Locations
- Monitoring Location Awareness

Module 23: Managing Security Exceptions

- Describing Security Exceptions
- Describing Automatic Exclusions
- Managing Exceptions
- Monitoring Security Exceptions

- Examining the Need for an Internal LiveUpdate Administrator Server
- Configuring an Internal LiveUpdate Administrator Server

Module 8: Analyzing the SEPM Content Delivery System

- Describing Content Updates
- Configuring LiveUpdate on the SEPM
- Monitoring a LiveUpdate Session
- Managing Content on the SEPM
- Monitoring Content Distribution for Clients

- SONAR
- Administrator-defined Scans

Module 15: Securing Windows Clients

- Platform and Virus and Spyware Protection Policy Overview
- Tailoring scans to meet an environment's needs
- Ensuring real-time protection for clients
- Detecting and remediating risks in downloaded files
- Identifying zero-day and unknown threats
- Preventing email from downloading malware
- Configuring advanced options
- Monitoring virus and spyware activity

Module 16: Securing Linux Clients

- Navigating the Linux Client
- Configuring Virus and Spyware Settings for Linux Clients
- Monitoring Linux Clients
- SEP for Linux Logs
