AIX Network Installation Management Concepts and Configuration

Duration: 2 Days Course Code: AN22G Delivery Method: Virtual Learning

Overview:

The primary goal of this course is to provide the student with a working knowledge of the fundamental capabilities of the Network Installation Management (NIM) facility of the AIX 7.3 operating system.

This course uses a combination of instructor lectures and lab machine exercises to provide the student with practical background knowledge of the topics covered. The lecture portion of this course will cover all the information required to create and maintain a Network Installation Management (NIM) environment.

The course will start with the students examining an existing NIM master. Then, the students will install the filesets required to configure a system to serve as a NIM master and configure NIM resources required to perform NIM operations. They will also have an opportunity to perform several key NIM related tasks. Each lecture is reinforced with extensive hands-on lab exercises which provide practical experience. The idea is to build a NIM environment (NIM master, NIM resources, and NIM clients), then use the NIM master and NIM resources to perform NIM operations on the clients.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is appropriate for anyone with system administrative duties installing and managing an AIX operating system in a multiuser POWER (System p) environment.

Objectives:

- **After this course participants should be able to:**
- Explain key NIM concepts and terminology
- Display NIM-related information
- Set up a NIM master
- Perform a base AIX (RTE) install
- Define and use several types of NIM objects
- Perform an automated install
- Create and use mksysb resources
- Maintain lpp_source and SPOT resources
- Update NIM clients

Prerequisites:

You should have:

- Basic knowledge regarding AIX systems administration
- Basic knowledge regarding the use of HMC V7 to manage POWER-based managed systems

The following course will provided the needed skills for this course:

- Power Systems for AIX I: LPAR Configuration and Planning (AN11G)
- Power Systems for AIX II: AIX Implementation and Administration (AN12G)

Testing and Certification

None

Follow-on-Courses:

None

Content:

Day 1

Unit 1: NIM Overview

Exercise 1: NIM Overview

Unit 2: Setting Up the NIM Master

Exercise 2: Setting Up the NIM Master

Unit 3: RTE Installation

Exercise 3: RTE Installation

Unit 4: Customizing Install Operations

Exercise 4: Customizing Install Operations

Day 2

Unit 5: NIM Backups and Restores

Exercise 5: NIM Backups and Restores

Unit 6: Managing Key NIM Resources

Exercise 6: Managing Key NIM Resources

Unit 7: Client Updates

Exercise 7: Client Updates
