

IBM Business Automation Workflow 23.0.2: Introduction to Process Applications

Duration: 1 Day **Course Code: WB875G** **Delivery Method: Virtual Learning**

Overview:

This one-day introductory course integrates training in business process management (BPM) methods and implementation with IBM Business Automation Workflow (BAW).

You learn core process modeling and implementation skills, the project development approach, process model implementation fundamentals, and delivery patterns.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is designed for project members who design and implement detailed logic, data models, and external system integrations for an executable business process. These roles include process owners, BPM analysts, BPM authors, BPM developers, BPM administrators, and BPM project managers.

Objectives:

- | | |
|---|--|
| ■ After completing this course, you should be able to: | ■ Recognize the purpose and function of Blueworks Live |
| ■ Identify the key capabilities of Business Automation Workflow | ■ Describe Business Process Management (BPM) principles and the process spectrum |
| ■ Describe the high-level architecture for Business Automation Workflow | ■ Create a process application |
| ■ List the core notation elements that are used in the IBM Process Designer | ■ Model a structured process based on process requirements |

Prerequisites:

Before taking this course, you should have:

- Practical knowledge of data structures
- Understanding of SQL syntax and JavaScript
- Basic understanding of web services
- Experience with modern programming techniques

Follow-on-Courses:

- WB876G IBM Business Automation Workflow 23.0.2: Controlling Process Flow using Data, Services and Coaches
- WB877G IBM Business Automation Workflow 23.0.2: Advanced Routing, Integrations, and Error Handling

Content:

■ Course introduction	■ Unit 2: Introduction to Business Process Management	■ Course summary
■ Unit 1: Introduction to IBM Business Automation Workflow	■ Unit 3: Playback 0: Modeling the As-Is and To-Be business processes	
■ Exercise 1: Creating your first process application	■ Exercise 2: Playback 0: Creating the To-Be process	

Additional Information:

Official course book provided to participants
