

IBM Business Automation Workflow 23.0.2: Handling Complex Interactions

Duration: 1 Day Course Code: WB878G Delivery Method: Virtual Learning

Overview:

Learn the essential techniques for building, configuring, and optimizing complex process interactions using IBM Business Automation Workflow 23.0.2.

In this one-day advanced course on process application development, you learn how to handle complex tasks and process interactions. You learn how to integrate your process application with external systems, implement a cancellation pattern, and how to handle content events in your process.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is designed for project members who design and implement detailed logic, data models, and external system integrations for an executable business process. These roles include process owners, BPM analysts, BPM authors, BPM developers, BPM administrators, and BPM project managers.

Objectives:

- | | |
|---|---|
| ■ After this course participants should be able to: | ■ Describe how to invoke REST services |
| ■ Explain how to use multi-instance loops to efficiently route work | ■ Implement a content event in a process |
| ■ Implement a cancellation pattern in a process application using an undercover agent | ■ Use the Target Object Store (TOS) to share documents between a BPM solution and a Case solution |
| ■ Build inbound and outbound web services | ■ Demonstrate integration between a Case solution and a BPM solution |

Prerequisites:

Before taking this course, you should have:

- Practical knowledge of data structures
- Understanding of SQL syntax and JavaScript
- Basic understanding of web services
- Experience with modern programming techniques

Testing and Certification

None

Follow-on-Courses:

None

Content:

- | | | |
|---|--|--|
| ■ Course introduction | ■ Unit 2: Integrating with external systems | ■ Exercise 3: Handling content events in a process |
| ■ Unit 1: Managing complex tasks and process interactions | ■ Exercise 2: Building web service connections | ■ Course summary |
| ■ Exercise 1: Building a cancellation pattern | ■ Unit 3: Handling content events in a process | |
