
IBM Tivoli Netcool/OMNIBus 8.1 Installation and Configuration

Duration: 3 Days Course Code: TN025G

Overview:

This course teaches you to perform a complete installation of IBM Tivoli Netcool/OMNIBus 8.1. Through lectures and extensive hands-on exercises, you learn all the steps necessary to perform an installation, including hardware sizing, confirming software prerequisites, installation, creation of ObjectServers, installation of probes, installation of gateways, configuring high availability, and deploying historical event reporting. Throughout the course, you practice your knowledge through extensive hands-on exercises that emphasize the skills taught in the lectures. The lab environment for this course uses the Red Hat Linux platform.

Target Audience:

This intermediate-level course is for anyone responsible for the installation of IBM Netcool/OMNIBus 8.1.

Objectives:

- Please refer to course overview for description information.
-

Prerequisites:

You should have the following skills:

- Practical knowledge of UNIX and typical UNIX-based tools
 - Practical knowledge of Network Fault Management
 - Basic understanding of database concepts, including language constructs, database versus table versus column, triggers
 - IBM Tivoli Netcool/OMNIBus V8.1 User course or equivalent experience
-

Content:

Basic Tivoli Netcool/OMNIbus components and concepts	Tools and automations	Overview
■ Overview	■ Introduction to ObjectServer SQL	Tivoli Common Reporting
Installation prerequisites and planning	■ Desktop tools	
	■ ObjectServer automations	
	Common integrations	Gateway for JDBC
■ Pre-installation planning	■ Overview	
■ Other considerations	■ Common probes	Event reports
Netcool/OMNIbus core installation	■ Optional probe features	
	■ Remote probe administration	
■ Pre-installation requirements	ObjectServer high availability	
■ Core installation	■ Overview	
■ Preliminary operation	■ Implementing high availability	
Netcool/OMNIbus Web GUI	■ Gateway configuration	
■ Installing Netcool/OMNIbus Web GUI	Process control	
■ Web GUI user features and functions	■ Overview	
■ Web GUI administrative features and functions	■ Visual Process Activity (PA)	
■ Web GUI user authentication		
Basic ObjectServer administration	Event archiving	
■ Netcool/OMNIbus directory structure		
■ ObjectServer structure		
■ Administration overview		
■ Modifying the ObjectServer
