

Planning and Administering a High Available SAP Landscape on MS Azure

Duration: 5 Days Course Code: AD611 Delivery Method: Virtual Learning

Overview:

This course provides an introduction to Azure for SAP workloads and will cover planning, migration and maintenance of the SAP workloads.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Application Consultant Business Process Architect Enterprise Architect Solution Architect System Architect Technology Consultant

Objectives:

- This course will prepare you to:
 - This seminar focuses on the architecture, sizing and configuration of Azure components that meet the specific requirements of a highly available high-performance SAP S/4 HANA landscape for test, quality assurance and productive systems. Learned best practices are implemented on SAP systems in the Azure Cloud.
 - Solutions architects and consultants are not only instructed in the design of a high-availability SAP Landscape but are also considered from a cost optimization perspective. Using concrete examples, various scenarios and reference architectures for a high-performance "SAP on Azure" cloud infrastructure will be presented.
 - The subsequent project steps necessary for the implementation or migration of an SAP Landscape, from the network via storage and server, for the SAP-specific application and database instances, are planned and set up as templates or blueprints in the Azure Cloud.
 - Attending this seminar enables you to participate in the Microsoft certification AZ-120 "Planning and Administering Microsoft Azure for SAP Workloads".
-

Prerequisites:

SAP Basis knowledge of SAP applications, SAP HANA, S/4HANA, SAP NetWeaver and SAP BW. Knowledge of the Microsoft Azure concepts, components and administration procedures within the Microsoft Azure Cloud
