

ONTAP SAN Foundations

Duration: 1 Day **Course Code: NEP_OT-SANF**

Overview:

English - Please note this course is only available in English.

Nederlands - Let op: deze training is alleen in het Engels beschikbaar.

Français - Veuillez noter que ce cours est uniquement disponible en anglais.

Learn how to administer, configure, and manage a NetApp® ONTAP® cluster by using the CLI and UIs such as NetApp ONTAP System Manager. Explore REST API automation for your cluster. Configure, manage, and protect block storage by using iSCSI, FC, and NVMe protocols for symmetric and asymmetric environments.

Target Audience:

Administrator

Content:

Module 1: SAN introduction	Exercises:	Managing block workloads
ONTAP and SAN	Configuring SAN access	Module 4: Next steps
Storage protocols	Module 3: SAN management	Documentation
SAN architecture	SAN mobility	Learning paths
SAN paths	SAN resize	Appendix 1: NVMe details
Module 2: SAN access	SAN data protection	Advantages of the NVMe protocols over the SCSI protocols
Initiator setup	SAN performance monitoring	
Target configuration	Exercises:
