

RPG IV Programming Fundamentals Workshop for IBM i

Duration: 4 Days Course Code: AS06G

Overview:

Developers who are familiar with programming in any High Level Language (HLL), but who are new to iSeries RPG IV will find this course the ideal introduction.

Target Audience:

This is the first in a series of three courses designed for programmers who are new to RPG IV. Basic programming experience is required. The student may have attended at least an introductory course to programming such as those available at colleges/universities. The student will not be taught the concepts of programming. This course is NOT designed for RPG III (RPG/400) programmers who wish to develop RPG IV skills. (See the OE85GB course for further details.)

Objectives:

- After completing this course, the student should be able to:
- Write RPG IV programs to produce reports
- Write simple RPG IV enquiry programs that interact with displays
- Use the editor to enter and modify source code
- Compile source code to create RPG IV programs
- Review compilation listings to find and correct any compilation errors
- Maintain existing applications written in RPG IV language
- Use the Debugger tool to determine the cause of incorrect results
- Use many popular RPG IV Built in Functions

Prerequisites:

Before attending this course, the student should be able to:

- Use a Windows based PC
- Run PC applications using menus, icons, tool bars, etc.
- Write a simple program in another high level language (for example, COBOL, BASIC or RPG II) - not necessarily on the iSeries platform
- Use and display iSeries Output Queues
- Use basic CL commands such as WRKJOB and DSPMSG.
- Use the Program Development Manager (PDM) and Source Entry Utility (SEU) tools to create and maintain DDS
- Create and maintain physical and logical files.

Content:

- | | | |
|---|--------------------------------------|---|
| ■ The course includes the following Topics: | ■ Data Representation and Definition | ■ Structured Programming and Subroutines |
| ■ CODE/400 Tutorial | ■ Manipulating Data in Calculations | ■ Accessing the DB2 Database Using RPG IV |
| ■ RPG IV Introduction | ■ Printing from an RPG IV Program | ■ Coding enquiry Programs |
| ■ Coding Specifications for RPG IV | ■ Using the Debugger | ■ What's Next? |
