

Contact Center Enterprise Fundamentals and Administration

Duration: 5 Days Course Code: CCEFA Version: 1.0

Overview:

This 5 day course combines the 1 day CCEF course and the 4 day CCEA course. Booking both together saves you money and ensures your team gets the training they need as quickly as possible.

The **Understanding Cisco Contact Center Enterprise Foundations (CCEF)** course gives you an overview of the Cisco® Packaged Contact Center Enterprise (PCCE) and Unified Contact Center Enterprise solutions. Focusing on the Cisco Contact Center Enterprise (CCE) family of products, you will explore key features and functionality of the solution including architecture, major system components, and tools used for administration and reporting. This course is the foundation for additional courses required to deploy, configure, support, and troubleshoot Cisco CCE solutions.

The **Administering Cisco Contact Center Enterprise (CCEA)** course teaches you the contextual information around call flow between components in the Cisco® Unified Contact Center Enterprise (UCCE) solution including intelligent contact routing, call treatment, network-to-desktop Computer Telephony Integration (CTI), and multichannel contact management over an IP infrastructure. You receive hands-on practice using administrative tools to perform routine adds, moves, and changes in an inbound contact center environment.

Target Audience:

Anyone requiring an understanding of the Cisco Contact Center Enterprise solution and who provides administration and Day 2 Support.

Objectives:

- **After completing this course, you should be able to:**
 - Provide a high-level overview of the Cisco Contact Center portfolio
 - List the key components within the Packaged Contact Center Enterprise (PCCE) architecture and their functions
 - Describe how calls flow through PCCE using appropriate terms and naming conventions
 - Introduce the tools used in the configuration, scripting, reporting and support of a PCCE deployment
 - Identify advanced features available within the PCCE solution
 - Navigate CCE configuration and scripting tools
 - Configure a dialed number, call type, and media routing domain
 - Build a basic Cisco Intelligent Contact Management (ICM) script
 - Configure agents and skill groups
 - Configure basic Interactive Voice Response (IVR) functionality
 - Implement attributes and precision queues
 - Configure Ring-No-Answer (RONA) using CCE configuration tools
 - Configure and populate an agent team and primary supervisor
 - Improve agent efficiency through finesse enhancements
 - Build and test a basic Voice XML (VXML) application
 - Implement roles, departments, and business hours
 - Run Cisco Unified Intelligence Center (CUIC) reports using the Reporting tool

Prerequisites:

Attendees should meet the following prerequisites:

- Basic knowledge of networking (Windows Active Directory, SQL) and components (servers, routers, switch) is helpful but not required

Testing and Certification

Recommended as preparation for the following exams:

- **500-422 CCEA** - Administering Cisco Contact Center Enterprise Exam

- Working knowledge of Unified Communications Manager and voice gateways
- Basic understanding of Cisco Unified Contact Center Enterprise architecture and operation

Follow-on-Courses:

- CCEAAR - Contact Center Enterprise Advanced Administration and Reporting
- CCEAA - Administering Advanced Cisco Contact Center Enterprise
- CCER - Reporting Cisco Contact Center Enterprise
