

Certified Information Privacy Manager + Exam

Duration: 2 Days **Course Code: CIPM** **Delivery Method: Virtual Learning**

Overview:

In this course, you will gain foundational knowledge on concepts of privacy and data protection laws and practice. You will learn common principles and approaches to privacy as well as understand the major privacy models employed around the globe. An introduction to information security concepts and information security management and governance will be covered including frameworks, controls, and identity and access management. You will also learn about online privacy as it relates to using personal information on websites and other internet-related technologies.

You will learn how to create a privacy program at an organizational level, develop and implement a framework, and establish metrics to measure program effectiveness. In an interactive format applying practices to a real-world scenario, you will review privacy program practices through the privacy life cycle: assess, protect, sustain and respond

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.
