

Certified Information Privacy Professional and Technologist prep course + Exam

Duration: 4 Days **Course Code: CIPPE-CIPT**

Overview:

Are you GDPR-ready?

The General Data Protection Regulation (GDPR) takes effect in 2018, are you ready for it? Among its mandates is the requirement to appoint a knowledgeable Data Protection Officer (DPO) tasked with monitoring compliance, managing internal data protection activities, training data processing staff, conducting internal audits and more. There's a lot to know, there's a lot at stake and there's a lot of opportunity for data protection professionals with the right training and education.

Achieving a CIPP/E and CIPT credential shows you have the comprehensive GDPR knowledge, perspective and understanding to ensure compliance and data protection success in Europe—and to take advantage of the career opportunity this sweeping legislation represents. The CIPP/E part of this training encompasses pan-European and national data protection laws, key data protection terminology and practical concepts concerning the protection of personal data and trans-border data flows. The CIPT part of this training gives you knowledge how to build your organisation's data protection structures from the ground up. With regulators worldwide calling for tech professionals to factor data protection into their products and services, the job market for privacy-trained IT pros has never been stronger.

Whether you work in the public or private sector, data privacy skills are quickly becoming a must-have—and that's a great opportunity for you.

This four-day programme covering the principals of information privacy, principles of data protection in Europe and principles of privacy in technology includes:

Official IAPP CIPP/E and CIPT Participant Guides
Official IAPP CIPP/E and CIPT Textbooks (via MyIAPP account under My Purchase then scroll down to My Ebooks)
Official IAPP CIPP/E and CIPT Practice Tests
IAPP CIPP/E and CIPT Certification Exam Vouchers
One-Year IAPP Membership

Your contact information must be provided to the IAPP for membership services fulfilment

Target Audience:

Data Protection Officers
IT Managers and Administrators
Records Managers
System Developers
IT Security specialist
Anyone who builds and develops IT systems

Objectives:

- In the CIPP/E part of this course you will learn about:
 - Data Protection Laws
 - Personal Data
 - Controllers and Processors
 - Processing Personal Data
 - Information provision
 - Data Subjects 'Rights'
 - Security or Processing
 - Accountability
 - International Data Transfers
 - Super Visions and Enforcement
 - Compliance
 - In the CIPT part of this course you will learn about:
 - Critical data protection concepts and practices that impact IT
 - Consumer data protection expectations and responsibility
 - How to bake privacy into early stages of IT products and services for cost control, accuracy and speed-to-market
 - How to establish data protection practices for data collection and transfer
 - How to preempt data protection issues in the Internet of Things
 - How to factor data protection into data classification and emerging tech such as cloud computing, facial recognition and surveillance
 - How to communicate data protection issues with partners such as management, development, marketing and legal.
-

Prerequisites:

Testing and Certification

Certified Information Privacy Professional – Europe (CIPP/E):

Achieving a CIPP/E credential shows you have the comprehensive GDPR knowledge, perspective and understanding to ensure compliance and data protection success in Europe—and to take advantage of the career opportunity this sweeping legislation represents.

Certified Information Privacy Technologist (CIPT):

Achieving the CIPT credential shows you've got the knowledge to build your organisation's data protection structures from the ground up. With regulators worldwide calling for tech professionals to factor data protection into their products and services, the job market for privacy-trained IT pros has never been stronger.
