

Certified Information Privacy Professional Europe (CIPP/EU) + Exam

Duration: 0 Days Course Code: CIPPE Delivery Method: e-Learning

Overview:

In this course, you will gain foundational knowledge on concepts of privacy and data protection laws and practice. You will learn about common principles and approaches to privacy as well as the major privacy models employed around the globe. An introduction to information security concepts and information security management and governance will be covered, which includes frameworks, controls, and identity and access management. You will also learn about online privacy as it relates to using personal information on websites and other Internet-related technologies.

The structure of EU law, the enforcement of EU privacy and security laws, and information management from a EU perspective will be discussed, as well as the limitations on private-sector collection and usage of data. This course will also provide an introduction to workplace privacy considerations and EU laws related to marketing, financial data, data security, and breach notification.

e-Learning
