

EC-Council Blockchain Fintech (BFC) + Exam voucher

Duration: 2 Days **Course Code: EBFC** **Delivery Method: Company Event**

Overview:

The BFC course will enable financial professionals to utilize blockchain technology to improve financial services and the insurance industry. Students learn the laws and regulations related to financial applications of blockchain and how to use PoW and PoS consensus mechanisms. In addition, the program provides in-depth insights into cryptocurrencies, including Bitcoin wallets and exchanges, among other topics.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

Finance professionals, fintech professionals, and related professionals interested in integrating blockchain into their organization's financial applications and needs.

Objectives:

- The structure and elements of a blockchain network, including how decentralization works
- Hashing and consensus algorithms and their role in blockchain networks, including proof-of-work (PoW) and proof-of-stake (PoS) consensus mechanisms
- The benefits of using blockchain technology and how to determine whether blockchain is the right solution for your business
- Digital currencies, including different types of cryptocurrency assets, the tokenization process, and how leading cryptocurrencies (e.g., Bitcoin, Altcoin, Litecoin, Zcash) work
- Decentralized finance, apps, and exchanges, including Bitcoin wallets and exchanges
- Initial coin offerings (ICOs) vs. initial public offerings (IPOs)
- Securitization of physical assets
- How blockchain works in the financial sector and common blockchain use cases in finance
- Laws and regulations related to the financial applications of blockchain, including how security tokens are regulated
- Blockchain applications in the insurance industry
- The basics of how Solidity and Ethereum work and the elements of the Ethereum ecosystem
- The structure and components of the Bitcoin network and how it works
- Bitcoin cryptomining and its relation to PoW consensus mechanisms
- Bitcoin's limitations, variants, and clients
- How to build secure smart contracts, including vulnerabilities in smart contracts and how to mitigate them
- Formal verification of smart contracts
- Privacy and confidentiality in blockchains
- Blockchain as a Service
- Permissioned and permissionless blockchains
- The basics of the Hyperledger Fabric framework
- Introduction to blockchain projects (including Fabric, Iroha, Burrow, and Indy)
- Decentralized autonomous organizations (DAOs)

Prerequisites:

Candidates must have:

- General awareness of business management processes
 - Basic knowledge of computers
 - Access to a Linux machine that can be configured as a virtual machine
-

Content:

Module 1: Introduction	Module 5: Blockchain Project Implementation	Module 9: Ethereum
Module 2: Financial Applications	Module 6: Bitcoin	Module 10: Open Source
Module 3: Cryptocurrency Assets	Module 7: Security in Blockchains	Module 11: Decentralized Applications (dApps)
Module 4: Insurance Applications	Module 8: Blockchain as a Service (BaaS)	

Additional Information:

Benefits of Blockchain Fintech Certification

- The BFC program offers a comprehensive look into the inner workings of blockchain technology and how it applies to the fintech industry.
 - The program is replete with assignments, and alternative testing methods keep students engaged in the topics beyond the program itself.
 - The course is designed and endorsed by bestselling authors and subject matter experts in fintech and blockchain.
 - The course offers practical advice on using blockchain in the financial services industry.
-
