

## EC-Council Certified DevSecOps Engineer (ECDE) + Exam voucher

**Duration: 3 Days**    **Course Code: ECDE**

### Overview:

**PROMOTION:** until the end of December 2023 you will receive a 50% discount when booking and participating in this training. To claim this discount you must use the promotional code ECDE50. Only at Global Knowledge!

This 3-day EC-Council training is a course that will prepare you for the EC-Council's Certified DevSecOps Engineer (E|CDE) certification. EC-Council's Certified DevSecOps Engineer is a hands-on, comprehensive DevSecOps certification program designed by SMEs that helps professionals build the essential skills for designing, developing, and maintaining secure applications.

**Benefits EC-Council's Certified DevSecOps Engineer certification:** Adding security to a DevOps skill set enhances career prospects. The information provided in the E|CDE course is complemented with labs to help learners hone their practical skills and become industry ready. This course teaches students how to use various DevSecOps tools and create secure code throughout the software development life cycle. Participants gain familiarity with DevSecOps tools that enable the secure development of software and web applications, both on premises and in the cloud. The E|CDE course focuses on application DevSecOps and also provides insights into infrastructure DevSecOps. The integration of today's most popular and important tools is illustrated at each stage of the DevOps life cycle. The E|CDE program helps DevSecOps engineers develop and enhance their knowledge and skills in securing applications at all stages of the DevOps pipeline.

### Target Audience:

Anyone with prior knowledge of application security  
CASE-certified professionals  
Application security professionals  
DevOps engineers  
Software engineers/testers  
IT security professionals  
Cybersecurity engineers/analysts

### Objectives:

- Understand the DevSecOps toolchain and security controls in the DevOps automated pipeline.
- Adopt security practices such as gathering security requirements, modeling threats, and securing code reviews within the development workflow.
- Learn AWS and Azure DevSecOps tools for securing applications.
- Integrate tools and practices to build continuous feedback in the DevSecOps pipeline using Jenkins and Microsoft Teams email notifications.
- Audit code pushes, pipelines, and compliances using various logging tools and monitoring logs like Sumo Logic, Datadog, Splunk, ELK, and Nagios.

### Prerequisites:

Students should have an understanding of application security concepts.

### Testing and Certification

**Exam Title:** EC-Council Certified DevSecOps Engineer (E|CDE)

**Exam Code:** 312-97

**Number of Questions:** 100

**Duration:** 4 hours

**Availability:** EC-Council Exam Portal

**Test Format:** Multiple choice

## Content:

This EC-Council course covers the integration and automation of all the widely used DevSecOps tools, processes, and methodologies that help organizations quickly build secure applications. E|CDE trains students in DevSecOps for cloud-based networks, including Amazon Web Services and Microsoft Azure. Our program has over 80 skill-based labs that teach security and tools integration at all eight DevOps stages.

MODULE 01 | Understanding DevOps Culture

MODULE 02 | Introduction to DevSecOps

MODULE 03 | DevSecOps Pipeline—Plan Stage

MODULE 04 | DevSecOps Pipeline—Code Stage

MODULE 05 | DevSecOps Pipeline—Build and Test Stage

MODULE 06 | DevSecOps Pipeline—Release and Deploy Stage

MODULE 07 | DevSecOps Pipeline—Operate and Monitor Stage
