

## FCP FortiManager

**Duration: 2 Days**    **Course Code: ENFCPM**    **Delivery Method: Company Event**

### Overview:

In this course, you will learn the fundamentals of using FortiManager for the centralized network administration of many FortiGate devices.

In interactive labs, you will explore deployment strategies, which include single or multiple ADOMs, device registration, policy packages, shared objects, installing configuration changes, provisioning FortiManager as a local FortiGuard distribution server, and troubleshooting the features that are critical to day-to-day use after you deploy FortiManager.

#### Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

### Objectives:

- **After completing this course, you will be able to:**
- · Describe the key features and capabilities of FortiManager
  - · Understand FortiManager API and meta fields
  - · Deploy administrative domains (ADOMs) to support multiple customers on a single FortiManager
  - · Restrict concurrent ADOM access by using workspaces and workflow mode
  - · Use provisioning templates for device-level changes across many devices
  - · Identify the synchronization states and manage the revision history of managed devices
  - · Manage firewall policies across multiple FortiGate devices using policy packages with shared and dynamic objects
  - · Deploy policies and objects from the global ADOM to multiple ADOMs
  - · Understand the Fortinet Security Fabric with FortiManager
  - · Describe high-availability (HA), backup, and recovery options for FortiManager
  - · Manage the firmware of supported devices centrally
  - · Offer a local FortiGuard distribution server to your Fortinet devices
  - · Diagnose and troubleshoot import and installation issues

### Testing and Certification

### Content:

#### Agenda:

1. Introduction and Initial Configuration
2. Administration and Management

3. Device Registration
4. Device-Level Configuration and Installation
5. Policy and Objects

6. Global ADOM and Central Management
7. Diagnostics and Troubleshooting
8. Additional Configuration

---
