

FCP FortiManager

Duration: 2 Days **Course Code: ENFCPM** **Delivery Method: Virtual Learning**

Overview:

English - Please note this course is only available in English.

Nederlands - Let op: deze training is alleen in het Engels beschikbaar.

Franais - Veuillez noter que ce cours est uniquement disponible en anglais. In this course, you will learn the fundamentals of using FortiManager for the centralized network administration of many FortiGate devices.

In interactive labs, you will explore deployment strategies, which include single or multiple ADOMs, device registration, policy packages, shared objects, installing configuration changes, provisioning FortiManager as a local FortiGuard distribution server, and troubleshooting the features that are critical to day-to-day use after you deploy FortiManager.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Objectives:

■ **After completing this course, you will be able to:**

- · Describe the key features and capabilities of FortiManager
 - · Understand FortiManager API and meta fields
 - · Deploy administrative domains (ADOMs) to support multiple customers on a single FortiManager
 - · Restrict concurrent ADOM access by using workspaces and workflow mode
 - · Use provisioning templates for device-level changes across many devices
 - · Identify the synchronization states and manage the revision history of managed devices
 - · Manage firewall policies across multiple FortiGate devices using policy packages with shared and dynamic objects
 - · Deploy policies and objects from the global ADOM to multiple ADOMs
 - · Understand the Fortinet Security Fabric with FortiManager
 - · Describe high-availability (HA), backup, and recovery options for FortiManager
 - · Manage the firmware of supported devices centrally
 - · Offer a local FortiGuard distribution server to your Fortinet devices
 - · Diagnose and troubleshoot import and installation issues
-

Testing and Certification

Content:

Agenda:

- | | | |
|---|--|---------------------------------------|
| 1. Introduction and Initial Configuration | 3. Device Registration | 6. Global ADOM and Central Management |
| 2. Administration and Management | 4. Device-Level Configuration and Installation | 7. Diagnostics and Troubleshooting |
| | 5. Policy and Objects | 8. Additional Configuration |
-
