

## FCSS SD-WAN

**Duration: 4 Days**    **Course Code: ENFCSSSDWAN**

### Overview:

**English - Please note this course is only available in English.**

**Nederlands - Let op: deze training is alleen in het Engels beschikbaar.**

**Franais - Veuillez noter que ce cours est uniquement disponible en anglais.** In this course, you will learn about common SD-WAN deployment scenarios using the Fortinet Secure SD-WAN solution. You will explore different situations, from a single enterprise site to multiple data center environments, that will help you to enhance and troubleshoot SD-WAN deployments.

### Objectives:

- **After completing this course, you should be able to:**
- · Describe the capabilities of the Fortinet Secure SD-WAN solution
  - · Deploy FortiOS SD-WAN solutions with FortiManager and FortiAnalyzer
  - · Configure basic SD-WAN features
  - · Configure advanced SD-WAN features
  - · Understand the SD-WAN route and rule lookup process
  - · Understand the different rule criteria and strategies available to steer traffic using SD-WAN and how SD-WAN responds to changing link conditions
  - · Deploy SD-WAN using basic IPsec and routing configuration
  - · Deploy SD-WAN using advanced IPsec and routing configuration
  - · Troubleshoot SD-WAN routing and rule matching issues

## Testing and Certification

### Content:

Agenda:

1. Introduction	3. Members, Zones, and Performance SLAs	6. SD-WAN Overlay Design and Best Practices
2. Centralized Management	4. Routing and Sessions	7. Monitoring and Troubleshooting
	5. Rules
