

SD-WAN Large Deployment Administrator

Duration: 2 Days **Course Code: SDWANLARGE** **Delivery Method: Virtual Learning**

Overview:

English - Please note this course is only available in English.

Nederlands - Let op: deze training is alleen in het Engels beschikbaar.

Franais - Veuillez noter que ce cours est uniquement disponible en anglais.

In this course, you will learn about common SD-WAN deployment scenarios using the Fortinet Secure SD-WAN solution. You will explore different situations, from a single enterprise site to environments with multiple data centers in multiple regions, that will help you to enhance and troubleshoot SD-WAN deployments. You will also learn how to deploy a new topology using the SD-WAN overlay template and the zero-touch provisioning process.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Anyone responsible for designing a Fortinet SD-WAN solution or for the day-to-day management of a Fortinet SD-WAN deployment and network operations should attend this course.

Objectives:

- **Objectives**
- After completing this course, you will be able to:
- Describe the capabilities of the Fortinet Secure SD-WAN solution
- Deploy FortiOS SD-WAN solutions with FortiManager and FortiAnalyzer
- Configure SD-WAN management on FortiManager
- Configure SD-WAN features
- Use the FortiManager SD-WAN overlay orchestrator
- Use ZTP to deploy SD-WAN branch devices
- Describe the use cases for SD-WAN with dual-hub topologies
- Design a scalable SD-WAN hub-and-spoke topology
- Deploy SD-WAN using ADVPN 2.0 and dynamic BGP

Prerequisites:

Prerequisites

You must have advanced knowledge of networking, and extensive hands-on experience working with FortiGate and FortiManager.

It is also recommended that you have an understanding of the topics covered in the following courses, or have equivalent experience:

SD-WAN Core Operations Administrator

FortiGate Administrator

FortiManager Administrator

Testing and Certification

Certificate

The participants will obtain certificates signed by Fortinet (course completion).

This course prepares you also for the *NSE6 -SD-WAN Architect* exam. By passing this exam, you will be awarded the associated exam badge.

Content:

Conspect	SD-Branch and Zero-Touch Provisioning	Dual-Hub and Multiregion Topologies
Centralized Management	SD-WAN Overlay Design and Best Practices	ADVPN
