## Certified Specialist in OpenShift Application Development exam

**Duration: 1 Day**    **Course Code: EX288**

---

### Overview:

The Red Hat Certified Specialist in OpenShift Application Development exam (EX288) tests your ability to deploy existing applications in a Red Hat® OpenShift Container Platform environment.

By passing this exam, you become a [Red Hat Certified Specialist](#), which also counts toward becoming a [Red Hat® Certified Architect \(RHCA®\)](#).

This exam is based on Red Hat OpenShift Container Platform 3.6.

---

### Target Audience:

These audiences may be interested in becoming a Red Hat Certified Specialist in OpenShift Application Development: Application developers in a DevOps role who are responsible for managing a Red Hat® OpenShift Container Platform environment Application developers in a DevOps role who are responsible for implementing a Red Hat OpenShift Container Platform environment Application developers who are responsible for creating containerized applications or converting existing applications into containerized applications

---

### Prerequisites:

### Testing and Certification

#### Exam format

This exam consists of a single section lasting three hours. The exam is a performance-based evaluation of your ability to deploy applications in a Red Hat® OpenShift Container Platform environment. You will perform a number of routine tasks similar to those you would be expected to perform in a normal DevOps environment and will be evaluated on whether you have met specific objective criteria.

#### Scores and reporting

Official scores for exams come exclusively from Red Hat Certification Central. Red Hat does not authorize examiners or training partners to report results to candidates directly. Scores on the exam are usually reported within 3 U.S. business days.

Exam results are reported as total scores. Red Hat does not report performance on individual items, nor will it provide additional information upon request.

---

## Content:

### Preparation

Red Hat encourages all candidates for the Red Hat Certified Specialist in OpenShift Application Development exam (EX288) to consider taking the Red Hat OpenShift Application Development I: Containerizing Applications (DO288) course to help prepare. Attendance in these classes is not required; students can choose to take just the exam.

While attending Red Hat classes can be an important part of your preparation, attending class does not guarantee success on the exam. Previous experience, practice, and native aptitude are also important determinants of success.

Many books and other resources on system administration for Red Hat products are available. Red Hat does not endorse any of these materials as preparation guides for exams. Nevertheless, you may find additional reading helpful to deepen your understanding.
