

Bottom Line Innovation

Duration: 3 Days Course Code: GBLIE100

Overview:

Innovation is the one key business competency that can quickly separate the winners from the rest in this fast-paced competitive environment. The sustaining value for more and more organizations is a prime focus on their intellectual capital as creators of innovation. This is becoming an organization's most important and valuable asset. "Value innovation is not defined as outpacing the competition; it is end-running the competition by creating new value propositions and thus having no competition for an initial period." (World Economic Forum) The Bottom Line Innovation program provides a proven process for the discovery of dozens of new, unexpected and useful ideas targeted at important organization.

Target Audience:

Team members, intact teams and others who need to develop new, unexpected and useful ideas to address business issues, challenges, opportunities and problems.

Objectives:

- After the workshop, you will be able to:
 - Employ eight different strategies to establish the right environment for innovation
 - Focus on key challenges and formulate a powerful challenge statement to focus your efforts
 - Use the Bottom Line Innovation process map to guide the creation and implementation of innovative ideas and solutions
 - Identify the ideal future and develop opportunity statements to shape and open possibilities
 - Brainstorm individually and collectively to begin idea generation
 - Go beyond brainstorming by using five pattern-breaking techniques to generate hundreds of new ideas
 - Pool ideas and select key ones using consistent evaluation criteria
 - Assess the relative risks and benefits of each idea to determine feasibility and establish priorities
 - Build action plans and gain commitment from the implementation team
 - Obtain support from others for your ideas and implementation plans
-
