Effective Facilitation for Business Analysts

Duration: 2 Days   Course Code: GK2657

Overview:

New & Exclusive - Acquire the facilitation skills necessary to effectively manage requirements meetings and workshops.
Business analysts have the responsibility to gather, analyze, and validate business and technical requirements for their projects, thus they need facilitation skills to manage requirements meetings and workshops.
In this highly interactive two-day course, you'll gain the skills to be an effective facilitator - one who can help stakeholders define their needs and form quantifiable requirements. You'll learn tested techniques for meeting planning and preparation, brainstorming, analysis, and decision-making. You will have the opportunity to practice these techniques in a safe environment with a trained facilitator who will give you relevant, timely feedback. Advanced topics will also be covered, including virtual facilitation, conflict management, and root cause analysis. You will leave class with the confidence to facilitate a meeting from the planning stages, motivating group participation, building consensus, maintaining session focus, and evaluating results for lessons learned.
Students pursuing a university-recognized and/or accredited certificate in Canada or continuing education units in the US must attend at least 90% of class time, participate in class exercises and section-knowledge checks, and score at least 70% on an end-of-class, multiple-choice assessment.

Target Audience:

Systems analysts, business analysts, requirements analysts, developers, software engineers, IT project managers, project managers, project analysts, project leaders, senior project managers, team leaders, program managers, testers, and QA specialists.
