
AWS Free Class - Generative AI Essentials on AWS

Duration: 1 Day **Course Code: GKAWS-FOC-GAE** **Delivery Method: Company Event**

Overview:

This course is free for AWS customers

In this course, you will learn about the fundamental concepts, methods, and strategies for using generative AI. You will gain a solid understanding of use cases where generative AI can provide solutions and address business needs. Additionally, you will learn about practical insights into technologies related to generative AI and how you can use those technologies to solve real-world problems.

By the end of the course, you will explore project planning and how to discuss implementation of generative AI in your organization.

Course level: Fundamental

Duration: 1 day

Activities: This course includes presentations, hands-on labs, demonstrations, and group exercises.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

This course is intended for those with limited prior knowledge of generative AI:

- Business analysts
 - IT supports
 - Marketing professionals
 - Product or project managers
 - Line-of-business or IT managers
 - Sales professionals
-

Objectives:

- | | |
|--------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| ■ In this course, you will learn to: | ■ Describe how to use generative AI responsibly and safely |
| ■ Summarize generative AI concepts, methods, and strategies | ■ Recognize the types of generative AI solutions with specific use cases |
| ■ Discuss the appropriate use of generative AI and machine learning and their technologies | ■ Explain implementation and project planning of generative AI to your organization |
-

Prerequisites:

None

Testing and Certification

■

Follow-on-Courses:

GK910010 - Developing Generative AI Applications on AWS

Content:

Module 1: Introducing Generative AI

- Generative AI explained
- Foundation models
- AWS generative AI services
- Demo: Generative AI solution

Module 2: Exploring Generative AI Use Cases

- Identify suitable use cases
- Generative AI applications and use cases
- Explore generative AI use case scenarios
- Use case for class

Module 3: Essentials of Prompt Engineering

- Introduction to prompt engineering
- Prompt design best practices
- Advanced prompting strategies
- Model settings and parameters
- Hands-on Lab: Optimizing Slogan Generation with Amazon Bedrock

Module 4: Responsible AI Principles and Considerations

- Introduction to responsible AI
- Core dimensions of responsible AI
- Generative AI considerations
- Hands-on Lab: Implementing Responsible AI Principles with Amazon Bedrock Guardrails

Module 5: Security, Governance, and Compliance

- Security overview
- Adverse prompts
- Generative AI security services
- Governance
- Compliance

Module 6: Implementing Generative AI Projects

- Introduction – Generative AI application
- Define a use case
- Select a foundational model
- Improve performance
- Evaluate results
- Deploy the application
- Demo: Amazon Q Business

Module 7: Integrating Generative AI into the Development Lifecycle

- Introduction
- Hands-on Lab: Capstone – Creating a Project Plan with Generative AI

Module 8: Course Wrap-up

- Next steps and additional resources
- Course summary

Additional Information:

Official course book provided to participants
