-

Prerequisites:

- Knowledgeable about their own business products / services and industry
- No prior technical knowledge is required

Testing and Certification

None

Follow-on-Courses:

None

Content:

Module 01 Introduction to Digital Transformation with Google Cloud

- Why cloud technology is revolutionizing business
- Digital transformation with Google Cloud
- Scale the innovation mindset
- Think about technology which no longer exists
- Apply cloud to solve your business challenges
- Identify the two core modernization areas
- Knowledge check - practice exam questions

Module 02 Innovating with Data and Google Cloud

- The value of data
- Data consolidation and analytics
- Innovation with machine learning
- Organize your business datasets into 'buckets'
- Identify the best data management solution
- Knowledge check - practice exam questions

Module 03 Infrastructure and Application Modernization with Google Cloud

- Modernizing IT infrastructure with Google Cloud
- Modernizing applications with Google Cloud
- The value of APIs
- Address business challenges with infrastructure modernization
- Relate infrastructure modernization options to your business
- Identify five key patterns for application modernization
- Knowledge check - practice exam questions

Module 04 Understanding Google Cloud Security and Operations

- Financial governance in the cloud
- Security in the cloud
- Monitoring cloud IT services and operations
- Identify how to improve operations using cost management approaches
- Recall and identify common cybersecurity threats
- Review misconceptions about security in the cloud
- Identify permissions and access requirements
- Knowledge check - practice exam questions
