

Information Security Foundation based on IEC/ISO 27001 + examen

Duration: 2 Days Course Code: ISF-EXIN

Overview:

Information security is becoming more and more important. The globalisation of the economy leads to an increasing exchange of information between organisations (employees, customers and suppliers), an increasing use of networks, such as the internal company network, the interconnection with networks of other companies and the Internet. Moreover, the activities of many companies now depend on ICT, with information becoming a valuable business asset.

Information security is essential to ensure the proper functioning and continuity of the organisation: information must be reliable. This Information Security Foundation based on ISO IEC 27001 course provide you all knowledge for the EXIN Information Security Foundation and is a relevant certification for all professionals who work with confidential information. It tests the understanding of concepts and value of information security as well as the threats and risks.

Target Audience:

This foundation-level certification is suitable for all professionals who deal with information, especially confidential information. Moreover, it creates a solid basis to pursue a higher level certification on the subject of Information Security. Entrepreneurs or small business owners who need a basic understanding of the subject also benefit from Information Security Foundation
