

## Prepare and visualize data with Microsoft Power BI (DP-605)

Duration: 1 Day Course Code: M-DP605

### Overview:

**Transform and load data, define semantic model relationships and calculations, create interactive visuals, and distribute reports using Power BI.**

Transform and load data, define semantic model relationships and calculations, create interactive visuals, and distribute reports using Power BI.

### Target Audience:

Students who want to generate dynamic reports with Microsoft Power BI.

### Objectives:

- Students will learn to,
- Get data in Power BI
- Clean, transform, and load data in Power BI
- Design a semantic model in Power BI
- Add measures to Power BI Desktop models
- Add calculated tables and columns to Power BI Desktop models
- Design Power BI reports
- Configure Power BI report filters
- Create and manage workspaces in Power BI
- Manage semantic models in Power BI

### Prerequisites:

- Completion of the [Get started with Microsoft data analytics](#) is recommended.

### Content:

Module 1 : Prepare and visualize data with Microsoft Power BI

- Get started building with Power BI
- Get data in Power BI
- Clean, transform, and load data in Power BI
- Configure a semantic model
- Design Power BI reports
- Get started with Copilot in Power BI
- Introduction to end-to-end analytics using Microsoft Fabric
