Plan, configure, and manage collaboration communications systems with Microsoft Teams (MS721)

Duration: 5 Days **Course Code: M-MS721** **Delivery Method: Virtual Learning**

Overview:

Plan, configure, and manage collaboration communications systems with Microsoft Teams prepares IT professionals to become Collaboration Communications Systems Engineers. Participants will learn how to plan, configure, deploy, manage, and troubleshoot Microsoft Teams-based collaboration systems, including Teams Phone, Microsoft Teams Rooms, Teams Premium, and other certified devices.

Learners will engage in hands-on labs and real-world scenarios that emphasize secure collaboration practices like least privilege access, identity protection, conditional access, and threat monitoring using Microsoft Defender and Teams admin tools. By the end of the course, learners will be able to:
- Design and implement Teams Phone with PSTN connectivity (Calling Plans, Operator Connect, Direct Routing)
- Manage Teams meetings, webinars, and town halls
- Configure Microsoft Teams Rooms and Surface Hub devices
- Monitor and optimize performance using Teams admin tools, PowerShell, and the Call Quality Dashboard
- Apply identity and access management best practices

Updated Oct. 2026

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

- Collaboration Communications Systems Engineers are responsible for planning, deploying, configuring, maintaining, and troubleshooting collaboration communication systems that include Microsoft Teams Phone, Microsoft Teams meetings, Microsoft Teams Premium, Microsoft Teams Rooms, flexible workspaces, and other certified and supported devices.
-To succeed in their role, they collaborate with Teams administrators, Microsoft identity and access administrators, Microsoft 365 administrators, and owners of other workloads, including facilities managers, network engineers, security engineers, device manufacturers, telephony providers, and Microsoft Certified solution providers.

Objectives:

- **After completing this course, learners will be able to:**
- Plan and design Microsoft Teams collaboration, meetings, calling, and communications solutions for enterprise environments.
- Configure and deploy Teams Phone, including Direct Routing and additional voice services.
- Plan Microsoft Teams Rooms and optimise network performance for high-quality Teams media experiences.
- Manage Teams meetings, events, policies, and collaboration experiences to meet business requirements.
- Configure and administer voice users, auto attendants, and call queues for effective communications management.
- Deploy, configure, and manage Teams-certified devices and meeting room solutions across the organisation.

Prerequisites:

Participants should have a fundamental understanding of networking, telecommunications, audio/visual and meeting room technologies, and identity and access management. They're also proficient in managing collaboration and communications solutions

Testing and Certification

Exam MS-721: Collaboration Communications Systems Engineer

by using Microsoft Teams admin center, Microsoft Teams Rooms Pro Management portal, PowerShell, and Microsoft Call Quality Dashboard.

Follow-on-Courses:

MS-700T00: Managing Microsoft Teams – for learners looking to broaden their Microsoft Teams administration and governance expertise.

Content:

Module 1 : Plan and design Teams collaborations systems

- Introduction to Teams meetings and calling
- Plan for Teams Phone
- Plan for Microsoft Teams Rooms and shared meeting spaces
- Plan and optimize network performance for Teams media
- Configure and deploy Teams Phone
- Configure and deploy Teams Phone with Direct Routing
- Extend Teams Phone with additional services

Module 2 : Manage Teams collaboration communications systems

- Manage meetings and events experiences
- Guided project - Create and assign Teams policies to meet business requirements in Microsoft Teams
- Configure and manage voice users
- Configure auto attendants and call queues
- Configure, deploy, and manage Teams devices
- Guided project - Prepare meeting room experiences
- Monitor and troubleshoot Teams collaboration communications systems
- Configure BYOD spaces and bookable desks
