

NIS 2 Directive Foundation (PECB Certified) + exam

Duration: 2 Days **Course Code: NIS2-F** **Delivery Method: Virtual Learning**

Overview:

Effective January 16, 2023, the NIS 2 Directive (otherwise known as the Directive (EU) 2022/2555) has been established to enhance the security of network and information systems across the European Union. This directive specifically targets critical infrastructure operators and essential service providers, mandating the implementation of robust cybersecurity measures and the prompt reporting of incidents to relevant authorities.

The scope of the NIS 2 Directive is broader, encompassing a wider range of organizations and sectors, while simultaneously strengthening security requirements, simplifying reporting obligations, and imposing more stringent measures and penalties. By adhering to the requirements outlined in the NIS 2 Directive, organizations can enhance their cybersecurity defenses, safeguard critical assets, and actively contribute to building a secure digital environment within the European Union.

The NIS 2 Directive Foundation training course outlines the essential insights necessary for understanding the requirements of NIS 2 Directive regarding cybersecurity measures. It provides the core concepts required to support organizations in the initial phases of planning, implementation, and management of cybersecurity programs.

After attending the training course, you can take the exam, and if you successfully pass it, you can apply for a "Certificate Holder in NIS 2 Directive Foundation" credential.

Virtual and Classroom learning - V&C Select[™]

V&C Select[™] is a simple concept and a flexible approach to delivery. You can 'select' a course from our public schedule and attend in person or as a virtual delegate. Virtual delegates do not travel to this course, we will send you all the information you need before the start of the course and you can test the logins.

Target Audience:

Cybersecurity professional seeking to gain a fundamental understanding of the requirements of the NIS 2 Directive and learn practical strategies to implement robust cybersecurity measure IT managers and professionals aiming to gain fundamental insights into implementing secure systems and improving the resilience of critical systems Government and regulatory officials responsible for enforcing the NIS 2 Directive

Objectives:

- This training course will help you:
- Explain the fundamental concepts and definitions of NIS 2 Directive
- Interpret the main requirements of the NIS 2 Directive for a cybersecurity program
- Identify the approaches and techniques used for the implementation of NIS 2 requirements

Content:

Day 1: Introduction to fundamental concepts and definitions of NIS 2 Directive

Day 2: NIS 2 Directive requirements for the implementation of a cybersecurity program
