

## Cortex™ XDR :Prevention and Deployment (EDU-260)

**Duration: 3 Days**    **Course Code: PAN-EDU-260**    **Version: 3.6**    **Delivery Method: Class Connect**

### Overview:

This instructor-led training enables you to prevent attacks on your endpoints. After an overview of the Cortex XDR components, the training introduces the Cortex XDR management console and demonstrates how to install agents on your endpoints and how to create Security profiles and policies.

The training enables you to perform and track response actions, tune profiles, and work with Cortex XDR alerts. It concludes by discussing basic troubleshooting of the agent, the on-premises Broker VM component, and Cortex XDR deployment.

Class-Connect™ HD

This is live hands-on interactive learning where you can attend a course from different training centres. This premium experience uses HD quality audio and video that connects the classrooms over a high capacity managed network to ensure a 'real time' experience. The instructor will be presenting from one location and students attending from other centres are able to interact with the instructor and other delegates using video and voice conferencing.

### Target Audience:

Cybersecurity analysts and engineers and security operations specialists, as well as administrators and product deployers.

### Objectives:

- Successful completion of this instructor-led course with hands-on lab activities should enable you to:
  - Tune Security profiles using Cortex XDR exceptions
- Describe the architecture and components of the Cortex XDR family
  - Perform and track response actions in the Action Center
  - Perform basic troubleshooting related to Cortex XDR agents
- Use the Cortex XDR management console, including reporting
  - Deploy a Broker VM and activate the Local Agents Settings applet
- Create Cortex XDR agent installation packages, endpoint groups, and policies
  - Understand Cortex XDR deployment concepts and activation requirements
- Deploy Cortex XDR agents on endpoints
  - Work with the Customer Support Portal and Cortex XDR Gateway for authentication and authorization
- Create and manage Exploit and Malware Prevention profiles
- Investigate alerts and prioritize them using starring and exclusion policies

### Prerequisites:

Participants must be familiar with enterprise product deployment, networking, and security concepts.

## Content:

Course Modules	5 - Malware Protection	10 - Basic Agent Troubleshooting
1 - Cortex XDR Overview	6 - Exploit Protection	11 - Broker VM Overview
2 - Cortex XDR Main Components	7 - Cortex XDR Alerts	12 - Deployment Considerations
3 - Cortex XDR Management Console	8 - Tuning Policies Using Exceptions	
4 - Profiles and Policy Rules	9 - Response Actions	

---

## Additional Information:

### **Palo Alto Networks Education**

The technical curriculum developed and authorized by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners helps provide the knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks product portfolio and your ability to help prevent successful cyberattacks, safely enable applications, and automate effective responses to security events.

---
