
Palo Alto Networks: Cortex™ XSOAR 6.2: Automation and Orchestration

Duration: 4 Days Course Code: PAN-EDU-380

Overview:

The Cortex™ XSOAR 6.2: Automation and Orchestration (EDU-380) Palo Alto course is four days of instructor-led training that will help you: Configure integrations, create tasks, and develop playbooks Build incident layouts that enable analysts to triage and investigate incidents efficiently Identify how to categorize event information and map that information to display fields Develop automations, manage content, indicator data, and artifact stores, schedule jobs, organize users and user roles, oversee case management, and foster collaboration

Target Audience:

Security-operations (SecOps), or security, orchestration, automation, and response (SOAR) engineers, managed security service providers (MSSPs), service delivery partners, system integrators, and professional services engineers

Objectives:

- This training is designed to enable a SOC, CERT, CSIRT, or SOAR engineer to start working with Cortex XSOAR integrations, playbooks, incident-page layouts, and other system features to facilitate resource orchestration, process automation, case management, and analyst workflow.
 - The third module of the course demonstrates a complete playbook-development process for automating a typical analyst workflow to address phishing incidents. This end-to-end view of the development process provides a framework for more focused discussions of individual topics that are covered in subsequent modules.
-

Prerequisites:

Participants must complete the Cortex XSOAR Analyst digital learning. Participants who have experience with scripting, the use of Python and JavaScript, and the use of JSON data objects will likely be able to apply what they learn more quickly than participants without such experience. However, completion of the course does not require proficiency in writing code

Content:

1 - Core functionality and Feature Sets	6 - Solution Architecture	11 - Jobs and Job Scheduling
2 - Enabling and Configuring Integrations	7 - Docker	12 - Users and Role Management
3 - Playbook Development	8 - Automation Development ; Debugging	13 - Integration Development
4 - Classification and Mapping	9 - Content Management	
5 - Layout Builder	10 - Indicators	

Additional Information:

The technical curriculum developed and authorized by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners helps provide the knowledge and expertise that prepare you to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks product portfolio and your ability to help prevent successful cyberattacks, safely enable applications, and automate effective responses to security events
