

Red Hat High Availability Clustering

Duration: 4 Days **Course Code: RH436** **Delivery Method: Virtual Learning**

Overview:

Red Hat Enterprise Clustering and Storage Management (RH436) provides intensive, hands-on experience with storage management, Red Hat Cluster Suite, and the shared storage technology delivered by Red Hat Global File System™ (GFS). Created for Senior Linux system administrators, this 4-day course has a strong emphasis on lab-based activities using enterprise-class storage, server, and auxiliary equipment. At the end of the course, students will have learned to deploy and manage shared storage and server clusters that provide highly available network services to a mission-critical enterprise environment.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Experienced Linux system administrators responsible for managing shared storage across one or more Linux systems Experienced Linux system administrators responsible for maintaining a high availability service using cluster technology

Objectives:

- Review of Red Hat Enterprise Clustering and storage management technologies
- Linux dynamic device management
- iSCSI
- Advanced software RAID
- Device mapper and multipathing

Prerequisites:

- RHCE certification or equivalent experience
- Students without an RHCE certification are encouraged to check their experience levels by taking a free pre-assessment test at redhat.com/explore/pre-assessment

Testing and Certification

- EX436 Red Hat Enterprise Clustering and Storage Management Expertise Exam
