

SAP Data Modelling in ABAP Dictionary and ABAP Core Data Services

Duration: 4 Days **Course Code: S4D430** **Delivery Method: Company Event**

Overview:

This course extends the skills that you acquired in the Basic and Intermediate ABAP programming courses with the ability to analyze and define data models. You will define database tables in the ABAP dictionary, and views in ABAP core data services (CDS). You will model relations, add SQL logic, and enrich your views with metadata. In the end, you will protect your data against unauthorized read access and learn how to extend foreign data models. The course is held on SAP BTP, ABAP environment. However, the content is equally suitable for SAP S/4HANA Cloud, ABAP Environment and SAP S/4HANA 2020 or later.
