

SAFe® 6.0 for Teams and SAFe® Practitioner (SP) – Including Exam

Duration: 2 Days **Course Code: SAFE-T**

Overview:

Our SAFe for Teams training course gives you practical knowledge and tools to be a valued, successful member of an Agile Team. Completing your learning journey with certification confirms your knowledge and offers renewable access to continued learning resources to advance your career with ongoing Agile training.

Target Audience:

SAFe for Teams also known as SAFe Practitioner (SP) is an ideal course for individual team members and expert contributors who work on an Agile Team (or are joining one) at an organization practicing SAFe and want to become Agile certified practitioners. It's designed for professionals working on an Agile team seeking to strengthen their real-world experience and gain expertise in how Agile ways of working drive value through the practices and principles in SAFe.

You'll understand the event rhythms, language, and skills needed to execute successfully on your team and enhance your project management capabilities.

-

Content:

Understanding Agile Release Trains (ARTs)	Learn how to size and plan work in cadence with other teams in the ART, from team-level sprints to detailed coordination for a full planning interval, enabling you to streamline productivity and optimize team performance.	Applying Lean-Agile Principles
Discover how Agile Teams work together on an ART, and how you can coordinate across teams to deliver value within an organizational structure.		Get familiar with the foundational principles behind SAFe (including lean thinking, agile values, and core concepts like flow, customer-centricity, and continuous improvement), helping you leverage these principles to achieve meaningful results.
Executing Iterations ; PI Planning	Cross-Team Collaboration	
	Understand the different roles within SAFe, points of synchronization to build alignment, and simple practices to make sure every team member and stakeholder is clear on the goals and product vision.
