

Implementing and Operating Cisco Security Core Technologies - Self Study Elements and Exam Prep

Duration: 2 Days Course Code: SCOR-EXTRA Version: 1.0

Overview:

Nederlands:

Deze Cisco SCOR Extra cursus is bedoeld voor cursisten die de SCOR cursus al gevolgd hebben, en nu meer verdieping en begeleiding willen richting het examen. Ook komen de zelfstudie onderwerpen van de SCOR cursus in deze training aan de orde waardoor zelfstudie tot een minimum wordt gereduceerd.

Deze 2-daagse training kan worden gevolgd in plaats van zelf het zelfstudie materiaal van de SCOR training door te hoeven nemen. Bovendien word je in deze training goed voorbereid op het SCOR examen (350-701).

=====

English:

This Cisco SCOR Extra course is meant for students who have already followed the SCOR course and now want more in-depth training and guidance towards the exam. The self-study topics of the SCOR course are also covered in this training, so self-study is reduced to a minimum. This 2-day training can be followed instead of studying the self-study material of the CCNA training yourself. This training is also a good preparation for the SCOR exam (350-701).

Target Audience:

Nederlands:

Iedereen die een Cisco SCOR-certificering wil behalen en zich hierbij graag optimaal wil voorbereiden op het SCOR examen, waarbij het zelfstudie-gedeelte van de SCOR training klassikaal wordt behandeld.

====

English:

Anyone wishing to achieve a Cisco SCOR certification and prepare optimally for the SCOR exam, whereby the self-study of the SCOR course is handled in the classroom.

Objectives:

■ Nederlands:

■ Deze training helpt je de SCOR certificering optimaal voor te bereiden en de zelfstudie onderdelen van de SCOR training tot een minimum te beperken.

■ ===

■ English:

■ This course will help you to optimally prepare for the SCOR certification and to minimise the self-study parts of the SCOR training.

Prerequisites:

Nederlands:

Deze training dient te worden geboekt in combinatie met de training 'Implementing and Operating Cisco Security Core Technologies ([SCOR](#))'

=====

English:

This course must be booked in conjunction with the 'Implementing and Operating Cisco Security Core Technologies ([SCOR](#))'

■ SCOR - Implementing and Operating Cisco Security Core

Content:

The topics of the self-study part of the SCOR training, including:

- Introducing Multicast Protocols
- Introducing QoS
- Understanding Enterprise Network Security Architecture
- Exploring Automation and Assurance Using Cisco DNA Center
- Examining the Cisco SD-Access Solution
- Understanding the Working Principles of the Cisco SD-WAN Solution
