Agile Scrum Foundation + examen

Duration: 2 Days   Course Code: SCRUM-F

Overview:

In today's business climate it is more critical than ever to remain flexible, keep costs low and shorten delivery cycle times. These growing pressures demand a new approach to development activities, project management approaches and business in general. Agile product development practices provide an iterative and adaptive approach to accelerating business value generation through the collaboration of cross-functional teams focused on continuous improvement, scope flexibility and delivering essential product quality. Scrum, the most popular Agile methodology is a framework for developing and sustaining complex products, while productively and creatively delivering products of the highest possible value.

This unique 2-day certification course provides the essential knowledge needed by IT professionals in Agile methodologies and Scrum practices. It focuses on the basic principles and concepts of both Agile and Scrum with an emphasis on several Scrum components like managing sprints, Agile meeting structure, the key roles and methods.
