

Service Desk Analyst - Including Exam

Duration: 3 Days **Course Code: SDA** **Delivery Method: Virtual Learning**

Overview:

Become a qualified Service Desk Analyst and boost your levels of customer service support

The importance of delivering high-quality customer service in today's support environment means that the responsibilities of IT support analysts are many. As a result, a diverse skill-set is required to meet the constantly evolving and increasing challenging demands placed on them.

Ensuring your first-line service desk team deliver excellent customer service through efficient IT support – whether it be face-to-face, via email, over the phone, by IM/SMS, chat or social media – to agreed IT service levels is vital.

This training course enables service desk and support analysts to gain a professional qualification, issued by PeopleCert, and equips them with the skills essential to delivering excellent levels of customer service and support.

Covering three days of classroom-based learning, plus the qualification exam on the last day of the course, analysts will fully explore the modules covered in the SDI Professional Standard for Service Desk Analysts and leave with a thorough understanding of best practice.

This training is delivered by the Service Desk Institute.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

The SDA qualification course is for front-line IT service and support analysts with some experience in a first line or second line service desk environment. This course is perfect for analysts looking to grow in their role and gain a recognised qualification in their profession. This course will help them to develop practical skills whilst earning a certificate that endorses their commitment and knowledge.

Objectives:

- At the end of this course, service desk analysts will gain:
- A thorough grounding in the skills, competencies and knowledge required of a professional and effective service desk and support analyst
- The essential skills and competencies to deliver efficient and effective support in line with SDI's best practice industry standards
- A clear understanding of how to identify customer needs and motivations, how to deal effectively with a variety of situations
- The ability to recognise the importance of teamwork in the support environment
- Knowledge of core IT service management processes and the role of the service desk within these
- Practical problem-solving techniques to help resolve customers' issues first time
- An understanding of service desk metrics, service level agreements, customer satisfaction surveys and the latest service desk tools and technologies
- An awareness of the need for developing professional relationships and for displaying respect and cultural sensitivity
- Practical preparation for taking the SDA examination with PeopleCert
- A new network of colleagues in similar roles from other organisations
